To whom it may concern,

Planning Application No: PL/2025/10022
(Land fronting Southwest of Witt Rd)

I wish to register an OBJECTION to the above application.

I regularly walk down Witt Road from Bentley Way. Witt Rd is a rural narrow single track lane with no foot path. I'm very concerned at the ever increasing traffic flow.

The 3 large houses that have just been built caused horrendous disruption for over a year because the access in Witt Rd is so bad. This was totally disproportionate to what one might expect when living with a building site on your door step.

I am also concerned that the above recently built houses, and any more houses built this side of Witt Rd, will prevent "run off water" being soaked up (as it has done for years). I note there has been a ditch dug to stop the new houses being flooded, this is just moving more water further down Witt Rd towards my home.

Surely it is time to say NO to more development down Witt Rd

Yours faithfully,
