Dear Sir

Householder Planning permission Ref PL/2025/09769

Radio Antenna 74 Eastern Avenue Chippenham SN15 3LW

For the attention of Alex Edge

Dear Sir

I am writing this because I have no access to online facilities. The Radio Antenna around both the house and garden of 74 Eastern Avenue has been a gradually growing source of discomfort for some considerable time now. It has grown from one small antenna some months ago back in 2025 to a rather untidy display with the latest being the triple adjustable monster which looks very unsafe perched at what appears to be above roof level. In a small garden area of a semi detached house the chance of storm damage affecting other residents properties seems a possibility. From a neighbours point of view it would be a better outlook if it had been in the form of a medium sized tree growing in the garden similar to those around the area. It may be of interest to note that there seem to be up to TEN different types of antenna displays in total around the house and garden at the 74 Eastern Avenue address.

Yours sincerely

D.J.Weaving
