Subject: RE: Parking Plan and Description for Tisbury Motors PL/2025/08707

Dear Becky,

Yes, the description should be adjusted to 7 houses, thank you.

The parking plan is a very simplified version of the site, where we show only the bulk of all blocks and the underground garage, on the same level, which, obviously, is not a realistic mapping, but it is focusing on the main topic of that sheet.

House 3 is above the underground garage entrance, hence I did not want to shade in that area, to do not show like cars go through a dwelling...

I thought that reading this sheet alongside with the others will make this obvious, but if you insist, I am happy to add an extra note and maybe some dashed line about this on that drawing.

Le me know please.

This would not affect the layout itself, as the garage calculated with the min. required car spaces and distances.

Yours sincerely,

Andrea
