Tree Surveyor : Stevyn Sargent

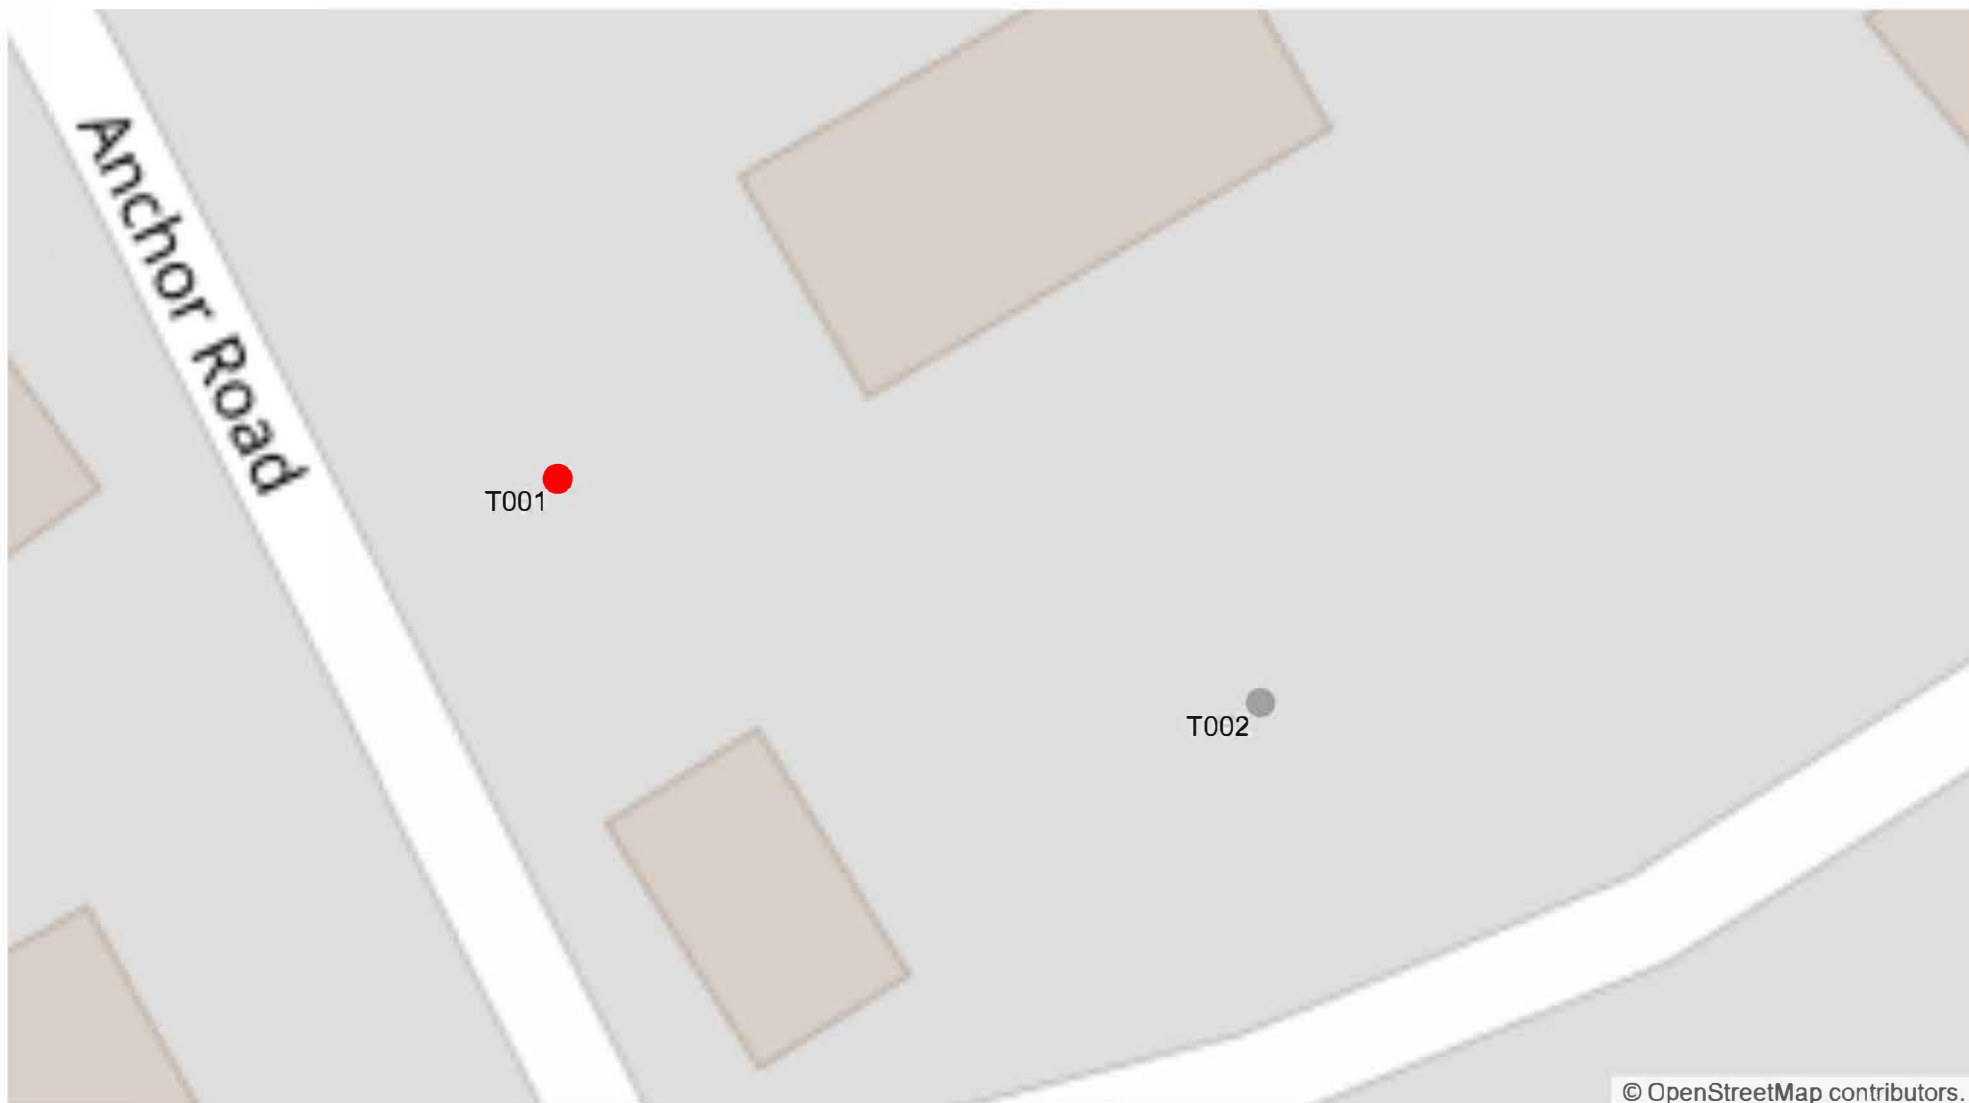

This tree and woodland survey was undertaken by a qualified inspector from ground level. It is advised that following any extreme weather conditions any damaged tree or tree movement that has occurred and noticed by persons on site or ground staff is reported to the surveyor for further advice or a revisit if required.

Ref.	Species	What3Words	Measurements	Retention Category	Survey Notes	Recommendation	Estimated time for works	work priority	reinspection period	Photo
T001	Black walnut (<i>Juglans nigra</i>)	///warriors.oddly.pupils	Height (m): 16 Stem Diam(mm): 850 Life Stage: Mature Rem. Contrib.: 10+ Years	U	Tree is leaning and heavily weighted west facing towards neighbouring property and road. canopy east facing towards house has been heavily reduced in the past causing the heavily biased canopy west facing. South west facing at ground level cavity detected in stem. South facing at ground level gannoderma spp present, bracket fungus is at same location as hollow. Old cobra bracing in tree supporting 4 limbs west north and east facing, bracing system is loose and with out expansion loops or shock absorbers. Crack in main stem at 12m crack extends through stem cobra system is attached round stem at site of crack, see photo. Large wound in lateral limb North east facing 1m from stem. Old pruning wound on main stem at 10m approx 20cm deep. South west facing limb at 10m over neighbouring property has large wound on top of limb.	Remove tree. Due to evidence obtained during climbing inspection, including crack in stem, cavity detected in main stem south west facing, and gannoderma fungal bracket and numerous cavities through out canopy.		6 Months		
T002	Black walnut (<i>Juglans nigra</i>)	///sprouting.buckling.gardens	Height (m): 14 Stem Diam(mm): 650 Spread (m): 5N, 5E, 5S, 5W Life Stage: Mature	C	South east facing at 5m bracket fungus on main stem. Main stem south facing at 5m old pruning wound with decay present. South facing at 5m on main stem old pruning wound with decay behind. Large lateral limb east facing at 2m has possible hazard beam from union for 2m. North facing at 2m old pruning wound in main stem. Possible crack in stem at 1m South facing.	Reduce canopy by 2m. Install COBRA system on lowest branch over driveway due to possible hazard beam		6 Months
