

In response to the Highways questions on the operational statement:

it will only be one client at a time, the maximum amount of dogs my clients have would be two dogs at a time, these will be kept in the pod with myself as there will be an area for the dog that I am not grooming but most dogs from one client get groomed together. They will never be loose in my garden without me and any noise from them will be kept to a minimum.

it will be pre booked appointments only. I do not allow walk in customers at all. Pre booked customers are given a time to arrive and drop their dog to me and a time to collect.

I will operate a booking system as I do already with my mobile business of the pre booked appointments on a timed schedule. There will be no overlapping of customers as I operate a one on one service. There will be a timed gap between customers which I need to clean up and organise in before the next customer arrives.

There will be ample parking on my driveway for customers to park on so there will be obstruction on the road or any obstruction to any of the other houses. There will only be one customers car at my address at any one time.
