Informative

- 3** If the presence of Swifts is identified during any works *it is recommended that work is undertaken outside of the breeding season, May to the end of August. If the nest sites are still being used and the work is undertaken during the breeding season, and the nests are occupied then the entrance to the nest sites must remain clear at all times. Swift nests are not 'traditional', they are made from bits and pieces the birds have collected on the wing. The swift is a red-listed Wiltshire Priority species so it is very important to protect known nesting sites, so we ask that if any nests are found, the entrances holes remain open and accessible on completion of the work.*
