

Design and access statement: 3 Crooked Corner

The proposal is to replace a porch door with a new, hardwood door of similar design and entirely in keeping with the external appearance of the property. By using the existing door furniture and applying a similar paint finish to this late 20th C addition to the historic building there will be no adverse impact to the building.

The work will be carried out in a single day and will not affect access or use of the roadway at the front of the property.
