Subject: RE: Styles Close - Biodiversity Gain plan - L/2025/09903

Hi Georgina,

Further to our emails below and the further queries from your biodiversity officer I can confirm that:

Allocation on the national register: The Gain Site Allocation Reference Number is: **BNGREG-N6Y4D-BF4Z7** and the credits are now showing on the register. I understand that the delays were due to an internal system error with the gain sites register which wasn't allowing the application to be processed in the usual way – Natural England have processed the allocation manually and this is resolved.

Strategic significance of off-site gains: Please see the attached document from Environment Bank.

Temporal multiplier: Environment Bank have advised that “SNOR2301 is in year 0. This has now been added to the metric and does not impact the number of units provided”.

Site area discrepancy: The correct site area is 0.035ha, rounded up by the metric to 0.04ha so the metric and credits are correct. The 0.025ha reference was incorrect in the BNG report, and I attach an amended version.

I trust the BNG condition can now be discharged.

Thank you.

Regards,

Kerry Fitter BA Hons MSc DipUD MRTPI
