You don't often get email from ed@cotswoldelectrician.co.uk. [Learn why this is important](#)

Hello Mr Millinship

Thank you for your email. I can confirm that the native species that we are planning to use for the compensatory planting include hawthorn (30%), blackthorn (30%), guelder rose(20%) and holly (20%).

Regards,

Ed Robinson  
Managing Director

Cotswold Electricians Ltd.

Hello Mr Robinson,

I'm dealing with the above application. I've reviewed the details informally with our Tree Officer and they are broadly okay with the proposed details. We do need the native species plants to be confirmed (i.e. hawthorn, field maple). Providing you can confirm the species we should be able to approve the details asap. Confirming the species mix by email should be okay, but if you can update the submitted plans/details that would be even better.

This information represents my informal opinion and is given in good faith. It is in no way binding on any future decisions of the local planning authority.

I hope this helps and I look forward to your response.

Kind regards,

Dave
