Any topping or lopping approval shall be carried out in accordance British Standard 3998: 2010 "Tree Work – Recommendations" or arboricultural techniques where it can be demonstrated to be in the interest of good arboricultural practise.

[In this condition "retained tree" means an existing tree which is to be retained in accordance with the approved plans and particulars; and paragraphs above shall have effect until the expiration of five years from the first occupation or the completion of the development, whichever is the later].

REASON: The application contained insufficient information to enable this matter to be considered prior to granting planning permission and the matter is required to be agreed with the Local Planning Authority before development commences in order that the development is undertaken in an acceptable manner, to enable the Local Planning Authority to ensure the retention of trees on the site in the interests of visual amenity.

Submitted Details:

- Record of Arboricultural Monitoring

The submitted Tree Protection Plan & Location plan and Record of Arboricultural Monitoring received were assessed by the LPA's arb officer who also attended the site. They can confirm that they are satisfied with the tree protection at the entrance of the site.

Therefore, the provided information is considered acceptable and capable of discharging the condition in full subject to the other details of the condition being met.
