

SUPPORTING DOCUMENT – PHOTO EVIDANCE

Side Boundary View

Shows the 1.8m fence along the side boundary set behind the existing low wall, with clear set back from the pavement and the established shrubs in situ set behind the fence reaching over 15ft.

Corner / Junction View

View from the corner junction showing that visibility up and down both roads is maintained, with the fence set back behind the low wall and existing 15ft hedging.

SUPPORTING DOCUMENT – PHOTO EVIDENCE

Other side road view

Shows the fence along the secondary side road boundary, demonstrating clear sightlines and unobstructed highway visibility. ALL hedging is still in situ but behind the 6 ft fence.

Previous condition – other side view

Shows overgrown hedging along the side boundary, protruding into the pavement and partially obstructing pedestrian access. The area appeared untidy and encroached beyond the property boundary.

SUPPORTING DOCUMENT – PHOTO EVIDENCE

Previous condition – Side Boundary view

Shows overgrown hedging along the side boundary, The area untidy and encroached beyond the property boundary.

Previous condition- Corner / Junction View

Overgrown hedging creating less visibility than the newly erected fence that improves tidiness and maintains full highway and pedestrian access. As you can clearly see, the fence provides a much clearer visibility for drivers at the junction than the previous overgrown hedging.
