This LED downlight distinguishes itself with several key selling points:

1. Full IP65 protection above and below the installation assures resistance to dust and moisture, making it robust for all weather conditions.
2. Constructed from non-corroding materials such as polycarbonate and acrylic, it's specifically designed to withstand coastal environments where salt and humidity are prevalent.
3. The CCT switch feature provides the flexibility to choose the perfect shade of white light, from warm to cool, ensuring the lighting always complements the space and occasion.

Designed with practicality and longevity in mind. It's an energy-efficient lighting solution, with a 5-watt LED lamp that brightly emits 520 lumens, ideal for creating a well-lit outdoor space with a warm and inviting glow.
