Subject: PL/2025/09378 - Parcels of agricultural land owned by Manor Farm,
Kempsford in Marston Meysey Village

Dear Sirs

I write on behalf of the Marston Meysey Parish Meeting (MMPM) having seen your consultation response in relation to the above application. In this, you raise no objection having assessed the comparative traffic flows between the historic Green Car Park and the anticipated flows from vehicles using the proposed campsite.

However, these will not be the only traffic consequences of the proposal as highlighted in the attached objection dated 28 February 2026 made against the application by the MMPM. In particular, you will see at paragraph 29 onwards the proposal as explained to the MMPM by the Applicant for a large number of double decker buses to run through the village, the unrestricted use of campsite traffic arriving and leaving outside of times when the one way system will be in place and likewise by vehicles needed to service the campsite and the facilities to be provided.

You will see also from paragraph 50 onwards our belief that even if these matters are judged to be acceptable that would presuppose the use of traffic management measures that necessitate proper and enforceable controls and mitigation measures. Connected to this, you will see our formal request for an Article 4 Direction and to assist the attachments relating to that are also included with this communication.

The MMPM would be very grateful if you could please consider these matters and add to your response to the application accordingly.

If you have any queries about the request of the MMPM, please do not hesitate to contact me.

Yours faithfully

Saleem Shamash BSc FRICS (Rtd) MRTPI (Rtd)
