

Access to Agricultural Building at Harris Croft Farm, Binknoll

1. Main farm gates at Harris Croft Farm on the right hand side. This is the entrance for all traffic.

2. Farm entrance on the left hand side (behind the red car) the agricultural building is behind the photo.

3. The agricultural building to be converted (building on the end as labelled in the photo) and the current concrete track in place. Its proposed this is widened out to the boundary to create parking.

The end building is the one being proposed for the change of use.

This grass area would become hardstanding to provide additional parking and to keep farm and commercial traffic separate.
