

# KENT BAT BOX 10656

SPECIES: BAT

MATERIAL: FSC wood

DIMENSIONS (MM): 185 x 145 x 375

WEIGHT (KG): 1.7

Wildcare's Kent Bat Box provides a range of crevice sizes, allowing for different species and temperatures. It has one small 15mm crevice, one larger 20mm crevice and a 20mm open crevice formed by the back of the box meaning that it provides a range of micro-climates that the bats can move between.

**SITING:** Fixing holes are drilled on either side of the baton. Mounting accessories not supplied. The box can be fixed to walls or flat surfaces or to trees. Fixing may be done by use of brackets, durable bands or wires. Boxes are best fixed as high as possible in sheltered / shaded locations where is a clear flight to the box entrance. Exposure to the sun for part of the day is acceptable. Several boxes may be placed near together. It should be the intention that boxes are to remain in position for several years. Boxes should not be disturbed, so check for occupancy by watching at dusk for bats to emerge.

**MAINTENANCE:** Self-cleaning - dropping simply fall out of the bottom.

**NOTE:** Based on an original design by the Kent Bat group
