Details of the pre-application advice received

Thank you for providing a plan/details of the proposed PTP that your client intends to install at the site in order to address the Habitat Regulations for this Class Q development. And for confirming that you wish to mitigate the new forest burden by this application. However, looking at the plan you have submitted, it appears that the new PTP is to be installed off site in the adjacent field and we therefore have the same issue with this Reg 77 application that I have raised about the Reg 77 application that has been submitted by one of your colleagues. I am afraid that the PTP needs planning permission because it constitutes development and change of use of a field; and is not in the curtilage of the dwelling that has been allowed by the Class Q permission and which it is to serve. It cannot therefore benefit from Class E PD rights and there is no other provision in the GPDO that allows development in association with a residential use in an agricultural field outside the residential curtilage. As you know, the Class Q application had a very tight red line (as restricted by this class) and therefore the curtilage of the new dwelling is very tight and so the consent did not give any sort of consent for this area of field to be used in association with the residential use of this building. Associated Reg 77 applications also need to relate to the same site as the original Class Q site, and in themselves they cannot grant planning permission for new works. They also cannot be conditioned. Only a S106 can be secured for Reg 77 applications and therefore only the purchase of credits for the 0.41 kg/TP/yr can be secured by this process. So the proposed PTP needs planning permission; but is off site for the Class Q; and wasn't covered by that recent approval. The Reg 77 application has to relate to the same site; cannot secure or grant permission for these works; or be subject to conditions to secure these works. This development cannot therefore be secured by the Reg77 route and therefore the habitat reg burden of the new house cannot be mitigated in this way. I consider that there are 2 choices, you can either apply for the burden to be mitigated by the purchase of council credits instead and thus continue with the Reg77 application – for both phosphate and new forest mitigation via this route. Or you can withdraw this Reg77 app and apply for a FULL application for the change of use of the building to be used as a dwelling, include the PTP site in the blue land so it can be secured by condition/the permission; and use the Class Q permission as a fallback argument.
