## Features & Benefits

Product information

Our solid steel Scoop door canopy is hot dip zinc galvanized before painting matt Black or Grey, or can be Aged to achieve a mellow zinc patina that looks like a lead roof. We can reduce the 19" high roof to 12.5" if there is limited height above your door. The roof has a front lip to guide rainwater sideways.

Materials

All of our materials are sourced from British suppliers. We use solid steel to manufacture every product in our ranges. Once the product has been made, it is hot dip zinc galvanized to a recognised British Standard EN ISO

Our black painted Scoop door canopy looks exactly how we visualised it and we're very pleased with the product quality and finish.

Mr S. Knight, Suffolk

Finishes

The product on this page is available in the finishes shown above, is made from solid steel then hot dip zinc galvanized before finishing. To view these finishes in more detail and for more information about each one, please visit

1461 to form a corrosion resistant finish.

Measuring advice

Width – To ensure that you select the most appropriate canopy size, please measure the width of the doorway from wall to wall. We recommend a minimum canopy overhang of 3"/75mm at both ends.

Height – The standard canopy height is 19", but we can make shorter heights of 12.5" or 7.5" to order. Measure the wall space available above the door. For more detailed advice, please [get in touch](#).

UK delivery

We can arrange delivery throughout the United Kingdom. We use an independent courier that offer next day delivery. Delivery is charged at cost, the price will depend on the number of items and weight of your order; we're happy to provide a quotation prior to placing your order. Once ready, we will contact you to arrange a convenient date for delivery.

For full delivery and payment details, please see our [terms and conditions](#).

our [Finishes](#) page. Bespoke finishes to order.

Installation

Each standard door canopy is a fully welded structure requiring no on-site assembly. The top rail has several pre-drilled holes, and both bottom corners have beautifully rolled eyelets for receiving the hexagonal head coachscrews (supplied). Ensure that the holes are drilled deeply enough to receive the screws. Once fitted, to be sure of a watertight fit, run a bead of good quality, clear roofing sealant along the top edge or use other roofing tape or lead flashing if your wall is very uneven.

International delivery

We can arrange packaging and shipping services worldwide using an independent carrier. The price will depend on the number and weight of packages and final destination. We can provide a quotation prior to placing your order. Once ready, we will contact you to arrange a convenient date for delivery.
