SW exceedance routed to landscaped areas

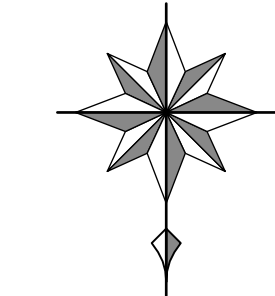

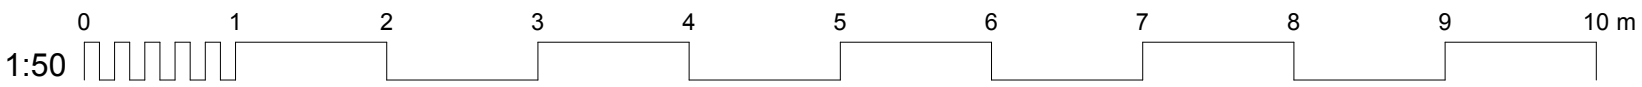

4 Proposed Roof Plan
Scale: 1:100

Drainage Verification & Actions Plan (DVAP)
Surface water (SW): clean runoff from roofs to natural landscaped areas for infiltration (no SW discharge to public sewer).
Foul water (FW): soil & waste only to existing foul system via existing ICs.
Existing drainage to be verified by proportionate CCTV/condition survey and dye testing.
Exceedance: overland flows routed to landscaped areas away from thresholds.

- Exceedance Surface Water flow direction
- Existing / verified Surface Water flow direction
- Extended drainage system to include new IC's for maintenance
- Existing drain run system (retained)
- Existing inspection chamber (IC)
