

- KEY
- New tree
 - Existing tree
 - Tree to be removed
 - Root Protection Area
 - New planting
 - Development Area - 0.08 hectare
 - BNG Area - 0.184 hectare
 - Modified grassland
 - Other neutral grassland
 - Low-level bollard lighting, downward facing output
 - Wall-mounted LED downlights

Bollard Light precedent

Wall Light precedent

External Lighting Design

The external lighting scheme will be selected and installed to comply with the following guidance:

Be fixed downlights with a 0 degree tilt angle. Floodlights or units which can be tilted are not appropriate.

Have a 0% upward light ratio. Meaning that the only light produced by the unit is directed to the floor. Some units also emit light upwards or sideways, these are not appropriate.

Be fitted with a low wattage LED bulb (maximum 5W) with a warm white colour temperature not exceeding 2700K.

All lighting shall be triggered by a PIR motion sensor to limit disturbance.
