

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

- ☒ Yes
☐ No

4.2 If no, what earlier date did you agree with the LPA?

4.3 How have you met the guidance on ‘what counts towards your BNG’?

[Find out what you can count towards a development’s BNG](#)

The post development habitats created are required to meet Statutory Biodiversity Net Gain requirements only and are not part of any other scheme e.g. mitigation for a protected species.

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you’ve taken on site, including to avoid or minimise the impact on irreplaceable habitats.

There are no irreplaceable habitats present on the Site.

The footprint of the proposed new extension has been positioned over an area of hard standing, with the loss of vegetated habitat limited to small areas of modified grassland (~58m²) and introduced shrub (~26m²).

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

- ☒ Yes
☐ No

4.6 How will you achieve the target net gain percentage?

- ☒ On-site
☐ Off-site
☐ Both

4.7 Are any of your on-site enhancements considered ‘significant’?

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

The habitat survey and condition assessment were undertaken outside of the optimal period for botanical assessment, however, given the low ecological value of the habitats present on Site this is not considered a constraint.
