

Wiltshire Council Planning Consultation Response

ECOLOGY

Officer name:	Jessica Cracknell
Date:	26/03/2026
Application Number:	PL/2026/00630
Proposal:	Demolition of the existing porta cabin building and the construction of a pair of semi-detached dwellings, landscaping and associated works.
Site Address:	Durrington Library, 75 Bulford Road, Durrington, Salisbury, SP4 8EU
Case Officer:	David Cox

Recommendations:

☐	No Comment
☐	Support
☐	No objection
☒	Condition (no objection subject to conditions)
☐	Objection - further information required
☐	Objection in principle
☐	HRA.

Thank you for your consultation on the above application. I have reviewed the submitted documents against OS maps, aerial photographs of the site and surrounding area, together with GIS layers of statutory and non-statutory designated sites and existing records of protected species.

The following submitted documentation was reviewed to inform this response:

- Ecological Impact Assessment. 27 January 2026. Eclipse Ecology. Report Ref. P283.1.1;
- The Statutory Biodiversity Metric. 27 January 2026;
- The Statutory Biodiversity Metric -Technical Annex 1: Condition Assessment Sheets and Methodology. P283.4.0 – Former Library Durrington – Statutory_Biodiversity_Metric_Condition_assessments_-_July_2025;
- Biodiversity Net Gain Assessment. 27 January 2026. Eclipse Ecology. Report Ref. P283.2.0;
- Natural England Nutrient Neutrality budget calculator for the River Avon SAC. Net Nutrient Statement;
- RE: Tree Information relating to planning application at 75 Bulford Road, Durrington, Salisbury, SP4 8EU. 16 January 2026. Wadey Trees. Ref. WT 122-25 AIA;
- Proposed Site Plan. Larkham Design Ltd. Drawing Ref. 0934/PL/103;
- Planning Statement. January 2026. Atlas Planning Group;
- Topographical Survey. 30 January 2025. Land & Building Surveyors. Drawing No. LDS/19634 TP1. Rev. A.

Salisbury Plain Special Area of Conservation (SPA)

This application lies within the 6.4km zone of influence of the Salisbury Plain SPA and in light of the HRA for the Wiltshire Core Strategy and the HRA for the Wiltshire Housing Site Allocations Plan it is screened into Appropriate Assessment due to the potential impact of recreational pressure on stone curlew in combination with other plans and projects.

A strategic Appropriate Assessment (AA) has been prepared pertaining to development within the 6.4km zone of influence that could result in a likely significant effect on the SPA as a result of an increase in recreational / visitor pressure. The AA reached a conclusion of no adverse effects on the integrity of the SPA or its qualifying features provided that the council's mitigation strategy continues to be implemented. Annual stone curlew monitoring and protection measures continue to be secured by the Council.

In January 2026 Natural England (NE) confirmed that the 2026 strategic AA for Salisbury Plain SPA continues to be supported by NE.

Habitat Regulations Assessment: River Avon Special Area of Conservation (SAC) Hampshire Catchment

This development falls within the catchment of the River Avon SAC and has potential to cause adverse effects alone or in combination with other developments through discharge of phosphorus in wastewater. Appropriate Assessment must be carried out by the relevant Competent Authority (the LPA) to determine the potential significant effects and the suitability of any measures proposed to avoid or mitigate those effects.

The submitted nutrient calculation [Net Nutrient Statement] calculated a total phosphorus budget of 0.23 kg TP/year pre 2030 and 0.06 kg TP/year post 2030. The budget has been approved by Wiltshire Council.

A Council-led scheme of phosphorus credits will be available for development which meets certain criteria at a fixed cost per kilogram of phosphorus, provided supply of mitigation is available. A completed Hampshire Avon Credit Screening Approval Certificate is required to apply for this scheme. The ecology section of this certificate has been completed by the Council's ecology team for this application. This certificate can only be issued by the case officer if the application meets the two deliverability tests. Further details of the Council-led scheme, including eligibility criteria, current cost to purchase credits, and details of how to apply, is available on our website [Phosphorus and nitrogen mitigation - Wiltshire Council](#).

Ecology officer approval	Document reviewed – 26/03/2026
Approval of Nutrient Budget	Pre 2030 budget - 0.23 kg TP/year Budget approved - Yes
	Date - 26/03/2026

Where an applicant chooses to progress without securing mitigation at permission stage, nutrient neutrality must be secured, before any development can lawfully commence, via a planning obligation (Grampian condition or legal agreement).

If the applicant elects to pursue this route, it should be noted that the planning permission will neither secure bespoke mitigation nor reserve any Council phosphorus credits. Consequently, there remains a risk that adequate mitigation may not be available, which could prevent the development from lawfully commencing.

A bespoke AA must be prepared and sent to NE, the application must not be determined until NE have endorsed the AA.

Protected Species

The Ecological Impact Assessment identified the existing building as having negligible potential to support roosting bats. The site is assessed to offering limited suitability for foraging and commuting bats, due to urban environment. The construction of a pair of semi-detached dwellings will not require the removal of vegetation considered to be functionally important for bat foraging or commuting. No new lighting has been proposed as part of the development and in the absence of such, together with retention of all vegetation, it is very likely that the functionality of the habitats within the site and their availability to bats will not be adversely affected.

The habitat within the proposed development site and the surrounding area is suitable for roosting, foraging and commuting bats. An increase in artificial lux levels can deter bats which could result in roost abandonment and/or the severance of key foraging areas. This will likely result in a significant negative impact upon the health of bat populations across the region. Any new lighting should be for the purposes for safe access and security and be in accordance with the appropriate Environmental Zone standards set out by the Institute of Lighting Engineers in their publication GN01:2021, 'Guidance for the Reduction of Obtrusive Light' (ILP, 2021), and Guidance note GN08/23 "Bats and artificial lighting at night", issued by the Bat Conservation Trust and Institution of Lighting Professionals.

Where possible, vegetation removal should be scheduled outside the bird breeding season (1st March–31st August) to avoid potential disturbance. If removal during this period is unavoidable, a pre-works nesting bird inspection must be conducted no more than two weeks before vegetation clearance begins. The applicant is advised to check any structure or vegetation capable of supporting breeding birds and delay removing or altering such features until after young birds have fledged. Damage to extensive areas that could contain nests/breeding birds should be undertaken outside the breeding season.

Biodiversity Net Gain (BNG)

Under Schedule 7A of the Town and Country Planning Act 1990 (as inserted by Schedule 14 of the Environment Act 2021) this application is required to deliver 10% Biodiversity Net Gain (BNG). The Biodiversity Gain Plan condition will automatically apply if approval is forthcoming.

A completed statutory metric calculation (27 January 2026) confirming the baseline and predicted post-development biodiversity units of the site has been submitted (including the baseline map).

Information in the completed on-site baseline habitat tabs is accepted as accurate based on the information submitted. The pre-development (baseline) situation is summarised below.

On-site pre-development (baseline) biodiversity value	0.02 Habitat units
	0.00 Hedgerow units
	0.00 Watercourse units
Are there any irreplaceable habitats on-site?	No
Has any habitat degradation of occurred?	No

Note to case officer: Appendix 3 Post Development Habitat Map (Ecological Impact Assessment. 27 January 2026. Eclipse Ecology. Report Ref. P283.1.1) identifies the areas of habitat creation which contributes to the applications proposed BNG, however detail on the plan is limited. Confirmation of how the development will achieve BNG is a post-determination matter however consideration should be given to how any proposed BNG will be secured.

Core Policy 50

Core Policy 50 of the Wiltshire Core Strategy requires all development to demonstrate no net loss of biodiversity and to seek opportunities to enhance biodiversity. The NPPF also encourages applications to deliver measurable net gains (para 186 d).

While it is not expected that this development will result in significant loss of habitat, both CP50 and NPPF requires the inclusion of biodiversity enhancements, such as bird and bat boxes. Ecological enhancements are provided through the installation of 4 swift bricks, 2 bee bricks and wildlife friendly planting, within section 8 of the Ecological Impact Assessment. The location of ecological/biodiversity enhancements must be included in the site plan drawings and will become an enforceable part of the planning permission. Bird/bat boxes will continue to be available for bats/birds for the lifetime of the development. Please see condition below.

CONDITIONS:

1. Compliance with submitted documents

The development will be carried out in strict accordance with the following documents:

- Section 7 and 8, Appendices 2, 3 and 4 of the Ecological Impact Assessment. 27 January 2026. Eclipse Ecology. Report Ref. P283.1.1;
- The Statutory Biodiversity Metric. 27 January 2026;
- The Statutory Biodiversity Metric -Technical Annex 1: Condition Assessment Sheets and Methodology. P283.4.0 – Former Library Durrington – Statutory_Biodiversity_Metric_Condition_assessments_-_July_2025;

- Biodiversity Net Gain Assessment. 27 January 2026. Eclipse Ecology. Report Ref. P283.2.0;
- Natural England Nutrient Neutrality budget calculator for the River Avon SAC. Net Nutrient Statement;
- RE: Tree Information relating to planning application at 75 Bulford Road, Durrington, Salisbury, SP4 8EU. 16 January 2026. Wadey Trees. Ref. WT 122-25 AIA.

REASON: For the avoidance of doubt and for the protection, mitigation and enhancement of biodiversity.

2. River Avon Phosphorus Mitigation

The development hereby permitted shall not commence until evidence of compliance to the Wiltshire Council River Avon Special Area of Conservation Mitigation scheme, or an alternative approved mitigation package addressing the additional nutrient input arising from the development, has been submitted to, and approved in writing by the Local Planning Authority.

REASON: To accord with the Conservation of Habitats and Species Regulations 2017, and Wiltshire Core Strategy Core Policy 69.

3. Water Efficiency in Hampshire Avon Catchment

The overnight development hereby approved shall be designed to ensure it does not exceed 110 litres per person per day water consumption levels (which includes external water usage) and a water efficiency assessment should be submitted. Before the development is brought into use, a water efficiency report certifying that this standard has been achieved shall be submitted to the local planning authority for its written approval.

REASON: To ensure compliance with the prevailing mitigation strategy for nutrient neutrality in the water catchment within which this development is located.

A water efficiency calculation will be needed to discharge this condition. For guidance on how to do this and what is required, please refer to the following document: '*The Building Regulations 2010 – Sanitation, hot water safety and water efficiency*', Appendix A (p36-44). https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/504207/BR_PDF_AD_G_2015_with_2016_amendments.pdf

4. Ecological Enhancements

Prior to the commencement of any works, including vegetation removal and demolition, details of the number, design and locations of opportunities for bats and birds (e.g. bat and bird boxes) shall be submitted to the local authority for approval. The approved details shall be implemented before occupation of the final works.

REASON: To provide mitigation /enhancement for biodiversity.

INFORMATIVES:

Hampshire Avon Phosphorus Mitigation

Evidence of compliance to the Wiltshire Council River Avon Special Area of Conservation Mitigation Scheme means the certificate of allocation of credits and confirmation of financial contribution to the scheme.

An alternative mitigation package must be approved by the local planning authority and Natural England with evidence of allocation to the scheme.

Protected Species

The applicant should note that under the terms of the Wildlife and Countryside Act (1981) and the Conservation of Habitats and Species Regulations 2017 (as amended) it is an offence to disturb or harm any protected species including for example, breeding birds and reptiles. The protection offered to some species such as bats, extends beyond the individual animals to the places they use for shelter or resting. Please note that this consent does not override the statutory protection afforded to any such species. In the

event that your proposals could potentially affect a protected species you should seek the advice of a suitably qualified and experienced ecologist and consider the need for a licence from Natural England prior to commencing works. Please see Natural England's website for further information on protected species.

Final sign off – all matters addressed:
