Section of wall to be rebuilt.

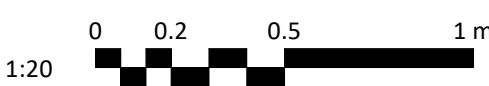

1:100 Existing Front Elevation (NE)

1:100 Proposed Front Elevation (NE)

1:20 Existing Wall Section

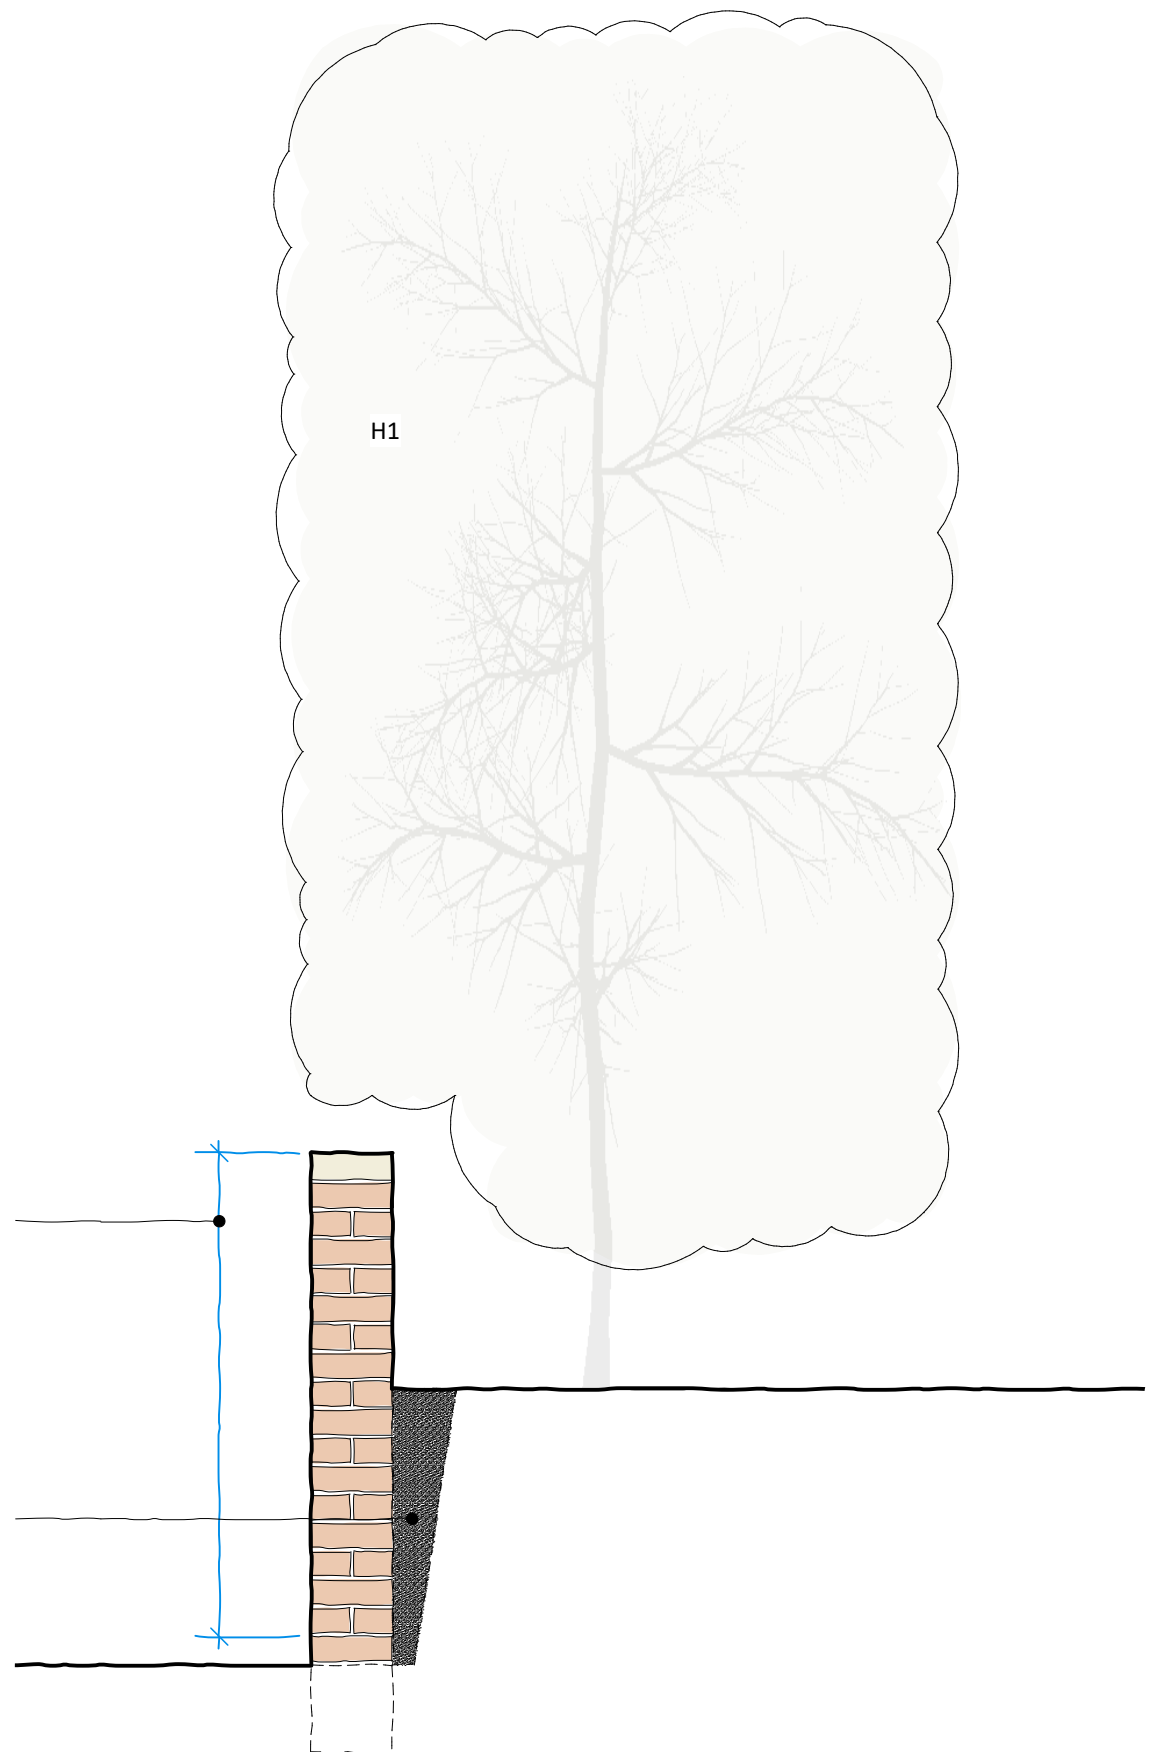

A large section of the existing brick wall is leaning towards the pedestrian path. The proposal includes carefully dismantling the wall, taking care to clean back the existing bricks and setting aside for re-use.

Wall to be taken down to solid base and rebuilt. Existing foundations unknown are to remain in situ.

The wall is to be rebuilt to match the existing using the salvaged and cleaned existing bricks in a Flemish bond. In the event further reclaimed bricks are required, these will be used on the back face. Lime mortar to be used to match the existing.

Surplus spoil behind the wall to be removed. To be back filled with pea shingle.
