Planning

Dear Sirs,

Re: Thatado Farm, Braydon, SN6 6RQ. Biodiversity statement.

This application is a retrospective application for caravan storage and an earth bund. The earth bund was built last year to create a division between the storage area and the field. The storage area has a stoned finish which has been in existence for many years as a hardstanding to the adjoining existing barn.

The entire site has been designed so that the field can always be restored to its original use with no permanent features, so will have no impact on more than 25m² of the site habitat.

[REDACTED]
R G Keech,

Agent.
