Subject: FW: FW: Planning Application PL/2026/00522 (Wilton Road .Salisbury)

Good Morning Mr Richardson

Further to the revised transport statement circulated late yesterday please see the attached the revised calculator (prepared by our consultants) to address the first ecology comment. This update to 120 l/pp/d increases the pre-2030 phosphorus budget by 0.03 kg TP/yr to 0.23 kg TP/yr.

With regards to the mitigation, we shall seek to go for the credits through the council's scheme once the application has been determined.

Hopefully with both the Access and Ecology considerations responded to we should like to believe that we have an understanding that the application will be favourably determined through your delegated powers.

In this regard we look forward to further hearing from you with a repeated thanks for all of your help and assistance

With kind regards

Barry
