

Dear Mr Thomas

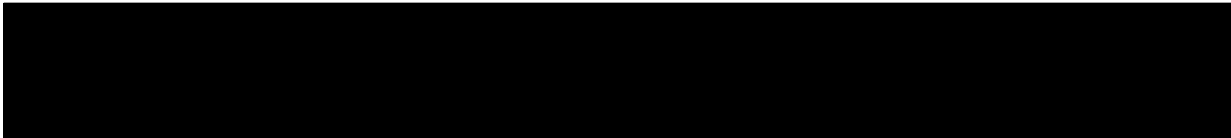

Re PL/2026/01558

We have lived next door to the applicants for over 10 years.

They recently spoke to us about their plans to build a dwelling on their land to provide a suitable home for their old age.

We strongly support their application for Technical Design Consent following their successful Planning In Principle as we know how much they love Whaddon and wish to live out their days here.

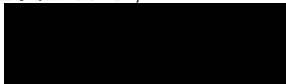

They nurture wildlife and would undoubtedly build a sustainable house in keeping with the local environment. The design of the building is environmentally friendly and visually appealing.

Although Whaddon is outside the settlement boundary for residential development in the current local plan, we believe an exception should be made for this couple who have lived in the hamlet for over 30 years.

It would address a specific housing need for elderly accommodation and free up a family home.

Yours sincerely

Sara and Anthony Clarke
