

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

1. Submission details

1.1 Date

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

☒ Yes

☐ No

4.2 If no, what earlier date did you agree with the LPA?

4.3 How have you met the guidance on ‘what counts towards your BNG’?

[Find out what you can count towards a development's BNG](#)

All habitat creation/enhancement has been provided for the purpose of biodiversity net gain, with no other functions or purposes that could be considered as other schemes. All habitat creation and enhancement included in the BGP contribute to the minimum 10% biodiversity gain requirement.

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

There are no irreplaceable habitats on site.

The biodiversity Gain Mitigation hierarchy has been applied to the development which can be summarised as follows:

Adverse effects on individual trees (the only moderate distinctiveness habitat on site) have been avoided through design.

All other losses affect low or very low distinctiveness habitats and adverse effects on these habitats have been compensated for by onsite habitat creation. The footprint of the new residential development is similar to the existing building and the existing garden habitat has been retained including all mature trees. The non-native ornamental boundary hedgerow has been replaced with a native species-rich hedgerow.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☐ Yes

☒ No

4.6 How will you achieve the target net gain percentage?

☒ On-site

☐ Off-site

☐ Both

4.7 Are any of your on-site enhancements considered 'significant'?

[Find out what counts as a significant on-site enhancement.](#)

☒ Yes

☐ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

The significant on-site enhancements are restricted to the creation of Other Neutral Grassland, a medium distinctiveness habitat on an existing arable field as detailed in section 5 of the Woolaway Bungalow Ecological Impact Assessment, which is required to be implemented by Condition 7 attached to the planning consent.

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

N/A

4.10 Explain why you're using off-site biodiversity units

Only answer this question if you're planning to use off-site biodiversity units (250 words).

N/A

4.11 Explain why you're planning to use statutory biodiversity credits

Only answer this question if you're planning to use statutory biodiversity credits (250 words).

N/A

4.12 Do you have a habitat management and monitoring plan?

☒ Yes

☐ No

4.13 Have you used the statutory biodiversity metric tool?
