Dear sir

Re:- Proposed Annex Building, Mr P Finlayson, Ref 97267

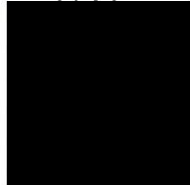

Further to our recent discussions with your office in connection with the above.

The above building is a single storey detached annex measuring 10.5m x 4.0m, constructed to your usual details and specification with a mortice and tenoned Oak frame, timber studded wall panels and a pitched roof.

The above building is of similar construction and smaller in size than that used as the basis of the generic Temporary Movement/Lifting details shown on our drawing 25/021/D01A and we confirm that the details contained thereon can be considered suitable for the above building.

We trust you find the above satisfactory but should you have any queries please do not hesitate to call.

Yours faithfully

B.Eng., C.Eng., M.I.Struct.E
