Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

The proposal constitutes a Change of Use of an existing building and minor external refurbishment (roofing). There is zero increase in the building's footprint and no groundworks or excavations are required. As shown on the submitted Block Plan, all works are confined to the existing structure and adjacent hardstanding. No onsite habitats, including the existing boundary trees and hedges, will be lost or degraded. The development impacts 0m² of habitat and 0m of linear habitat, falling significantly below the 25m² de minimis threshold for Biodiversity Net Gain.

Note: Please read the help text for further information why developments may be exempt or not in scope.

- ☒ Yes
- ☐ No

If Yes, please provide details:

Provision is made for the storage of one general waste bin per unit and one recycling bin per unit within the site boundary, as shown on the Block Plan. Given the small scale of the unit (36 sq.m), waste generation will be minimal and handled via private commercial collection.

Have arrangements been made for the separate storage and collection of recyclable waste?

- ☒ Yes
- ☐ No

If Yes, please provide details:
