

Natural Stone Cladding, Slips and Stone Veneers

ZCladTM
Natural Stone Cladding

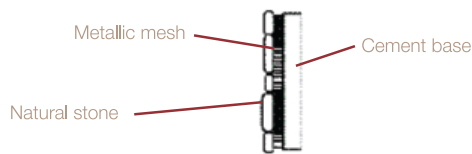

About Stone Cladding Panels

Natural stone - made simple.

ZClad™ is a cladding system made from natural stone. It creates a stylish veneer, whether building a contemporary or traditional design.

The panels give a seamless finish for straight walling and cornering making it virtually impossible to detect. A ZClad™ wall can be erected in a fraction of the time taken by conventional methods.

Our **ZClad Panels** can be fitted to brick/block, ICF, timber framed and SFS building types using our Z Board system with adhesive, screw fixings and tape. We have more details available on **ZClad.co.uk**

BBA Accreditation

Technical assessment of ZClad products

We are in the midst of BBA (British Board of Agrément) testing of the ZClad products and are awaiting approval for full accreditation.

Natural Stone Cladding

About Stone Cladding Slips

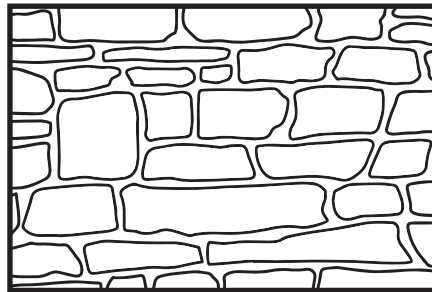

Natural stone cladding slips from ZClad, 100% solid stone wall cladding at only 15-30mm thick, ideal for all building and walling applications.

We produce our natural split face cladding slips by cutting a slim face from full-sized pieces of traditional facing stone, to create individual cladding pieces of approx. 15-30mm thickness. These retain the natural stone face in the chosen build style - rubble and random - but with a fraction of the bulk. Our cladding slips give the appearance of an authentic, traditional stone wall without the complexity. L-shaped corners also available.

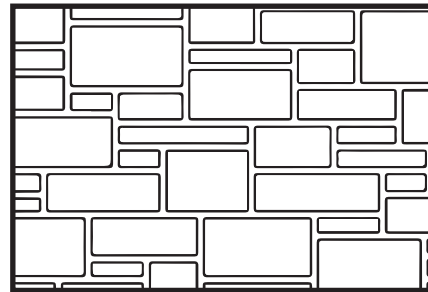

Rubble Stone Cladding Slips

Random Stone Cladding Slips

Semi Coursed Stone Cladding Slips

Adhesive & Sealer

ZClad Adhesive 20Kg Bag

- For interior & exterior fixing.
- Provides a coverage of 2.5m² based on an application with a 10mm notched trowel.
- Extended open time up to 30 mins.
- Water & heat resistant* (18cm away from source of heat).
- Suitable for fully immersed tiling.
- Mixes to a smooth and creamy paste.

ZClad Natural Finish Stone Sealer

A natural finish water based impregnating sealer for stone walling.

Helps protect against staining and helps the treated surfaces strongly repel water, oil and grease.

- Dry (Invisible) finish.
- Suitable for Natural stone such as Quartz, Slate, Granite, Limestone, Sandstone.
- Provides excellent water repellent and stain resistance.
- Protects from natural stone diseases.
- Average coverage per 5 litre bottle: 75m² (2 coats recommended).
- Easy application with pump sprayer or brush.
- Available in 1 litre and 5 litre bottles.
