

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

- An area of modified grassland will be enhanced to other neutral/wildflower grassland, which is expected to meet a 'moderate' condition. This will be achieved with the inclusion of EL1 and EM1 basic general purpose meadow mixture by Emorsgate.
- The infilling of the sycamore 'species-poor' hedgerow with native infill mix to be enhanced to a 'species-rich' hedgerow, which is expected to reach a 'good' condition.
- The creation of additional species-rich hedgerow along the currently present sycamore hedgerow, which is expected to reach a 'good' condition.
- Inclusion of 11 new scattered trees within the Application Site; to include native species and expected to reach a 'moderate' condition.
