

## Materials Schedule

We note that this building is an existing building and not a new structure meaning it is already found on the site and seen from the surrounding area.

Summary of external materials/finishes based on provided notes (green finish to match the National Landscape/marsh moorland tone BS12B21).

| Element / Component  | Location / Extent                    | Material / Type         | Finish / Colour                                       | Notes / Requirements                                                                                                                                                      |
|----------------------|--------------------------------------|-------------------------|-------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Roller shutter doors | Northern Elevations                  | Roller shutter door     | Green Moorland - BS12B21                              | Colour to be agreed                                                                                                                                                       |
| All other doors      | External doors (where applicable)    | Steel doors             | Clad/powder coated finish in Green Moorland - BS12B21 | Notes suggest steel doors powder coated in Green Moorland (Colour to be agreed); alternative option mentioned: timber cladding if required by LPA but this is less secure |
| Concrete panels      | Areas not visible from the main road | Precast concrete panels | Painted Green Moorland - BS12B21 (where required)     | Panels generally not seen from the main road; applicant happy to paint them Green Moorland - BS12B21 (colour to be agreed)                                                |
