

Meet The New

LG Therma V Monobloc

Heat Pump

This standalone system offers seamless installation while delivering reliable heating and hot water with exceptional energy efficiency. Designed for versatile environments, it operates quietly and efficiently, even in extreme temperatures, ensuring year-round comfort while reducing energy consumption and carbon emissions.

Key Features of the New LG Monobloc Heat Pump

1 Versatile Aesthetic

The refined grey design seamlessly adapts to various surroundings, ensuring a modern and unobtrusive appearance.

2 Effortless Installation

A standalone heat pump with a plug-and-play solution, allowing for quick and easy setup.

3 Whisper-Quiet Operation

Low noise levels provide high installation flexibility, making it ideal for various settings.

4 High-Temperature Output

Capable of reaching a maximum flow temperature of up to 65°C for versatile heating needs.
