

Cumulative Zone of Theoretical Visibility (ZTV)

Zone of Theoretical Visibility (ZTV) was calculated using a spatial modelling algorithm which considers the following parameters:

- 1.6m Receptor Elevation (Observer Height)
- Proposed Building Height at the Site: 12.9m.
- Proposed Building Heights at Cumulative Projects:
Site 1: 9m. Site 2: 10m. Site 8: 9.5m. Site 9: 9.5m.
Site 10: 16m. Site 13: 10.5.
- 360 Degree Field of View
- LiDAR 1m First Return Digital Surface Model (DSM) (vertical accuracy of +/- 5cm)

client

Gleeson Land Ltd.

project title

Land East of Blackmore Farm, Melksham
