Description of Proposed Works

Please describe the proposed works

The application seeks permission to convert the unused loft into a bedroom and bathroom. To make the space habitable, insulation is to be installed between and over the rafters, to maintain sufficient headroom. This will raise the height of the roof line by 145mm. To light and ventilate the space 6 sets of Velux conservation rooflights are to be installed, which have a minimum projection above the tile line.

The loft conversion and skylights themselves would fall under permitted development. The increase in roof height, however, triggers the need for a householder planning application. This is accommodating insulation between and above the existing rafters. This will increase the amount of insulation it is possible to install while maintaining sufficient head height internally and is in line with Wiltshire’s environmental ambitions.

This is subject to exemptions, an exemption applies in relation to planning permission for a development which is the subject of a householder application, within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order (2015)*.
