

External dimensions:

- Including handle: 44 x 62.5 x 28.5cm
- Excluding handle: 44 x 62.5 x 24.5cm

Internal dimensions:

- Floor to shelf: 33cm
- Width: 28.5cm
- Depth with door closed: 16cm

Protection against the elements

The double-skin construction gives good thermal insulation, while the thermostatically controlled heater prevents the inside from freezing and an air circulation fan prevents condensation. There is also a safety cut-out mechanism to protect the unit.

The cabinet is IPP6 rated for protection from dust and water ingress.

Extra strong construction

Body made of tough polyethylene the cabinet is highly resistant to corrosion and impact.

The door is made of polycarbonate, the same material used in riot shields.

3 bold fixing to the wall ensuring a stable fixing even on uneven surfaces.

LED lighting

Efficient internal illumination, making it highly visible at night.

Low voltage and low energy
Secure and easy to open

Features metal hinges with security fixings to minimise the chances of damage or vandalism.

Single handed entry and large handle makes it easier to open.
