Subject: Planning application reference PL/2026/01852

Good morning,

I will be forwarding this on email on to other parties, as this is a complaint.

Regarding planning application PL/2026/01852

I am completely object against this proposal and would have put this on the official site, if myself and my neighbours had been informed of this proposal this is not the case. One of my neighbours found put from someone who lives on a different street. Myself and neighbours, properties have been situated on the holt road for over 20years and yet were not informed about this application.

On another note, the risk to health is not a risk worth taking, [REDACTED] you may be willing to risk people's health. [REDACTED]
[REDACTED] So, no, I don't want the mass application to go ahead.

Finally, I would have written this in an objection form, but this would require the site to allow you to do anything when indeed, it was supposed to allow anyone's comments up to midnight on 01/05/2026.

Because of not informing residents situates directly on holt road, to health implications, you can be ensured this will be forwarded to everyone, including what action I can take against this.

Regards

Mss Mizen
