Dear Jennifer,

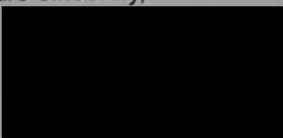

Re- Planning application to create a new parking bay at 2 Lower Street, Edington

We understand that you and your neighbour are to applying for planning consent to create an off street parking bay at your house. This being located opposite our house, we fully support this proposal.

Currently there is no off road parking for the property's cars or for cars visiting the site. This means that cars are only able to park alongside the verge to the road. This creates an obstacle for traffic coming from the 'T' junction as to pass the parked cars they have to head past our entrance on the wrong side of the road. This is obviously not an ideal situation for us when we want to come out of our entrance. We feel that removing parked cars from the highway can only be beneficial to us.

As with our neighbours, you have said that your agent has stated that there may be reduced visibility from the proposed off road parking bays. To help with this situation, we would be more than happy for a mirror to be sited on our land opposite your parking bay, so that traffic coming from the 'T' junction may be clearly seen. The exact location of a mirror needs to be agreed so that it does not obstruct our view of the road as we exit our driveways from 2a and 2b Lower Road.

Yours sincerely,

Paul and Donna Mountford
