29th April 2026

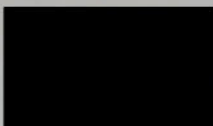

Dear Jennifer,

I refer to your proposal to create an off- street parking bay at your house opposite our entrance.

We are in full support of this, as cars currently visiting your house park in the street creating a potential hazard. It means that traffic now coming from the T' junction is heading towards us on the wrong side of the road and creates difficulties for us when we exit our drive. So anything which improves the situation is welcomed.

We understand from your agent that there will be difficulty seeing traffic coming from the junction so to help with this situation, we would be happy for a mirror to be on our land opposite your parking bay to help the situation.

Yours sincerely,

David and Jacqueline Pike
