

TIMBER
WINDOWS

MR ROBIN HUNT

IT'S THE DETAIL THAT MAKES THE DIFFERENCE!

We are passionate about wood and since our launch, our suite of products has led the market in the breadth of application, uniqueness of design, quality of construction and performance in use. Established in 1984, we have served the Oxfordshire and Gloucestershire areas, enhancing the homes of many thousands of satisfied customers.

Attention to detail is a hallmark we are proud of. Our collection has been carefully and sensitively tailored to complement the English home - whether you live in a period villa, a barn conversion or a more modern property in need of contemporary flair. Unlike timber windows of old, our products will not twist, will not rot and require very little maintenance. High levels of insulation and security ensure there is no need to sacrifice beauty for comfort.

The Timber Windows service is delivered with care by knowledgeable local specialists whose reputation is built on providing an attentive service from initial enquiry to the completion of your project.

Installing well-made, well-specified timber windows can really enhance the beauty and value of your home. We look forward to working with you on your exciting project!

ENTRANCE DOORS

By looking at front door designs around the country we built a collection suitable for every kind of home, from traditional styles and those suitable for conservation, to sharper, more contemporary designs.

Whichever style you choose, security is assured with robust, multi-point locking mechanisms, featuring hook bolts and deadlock.

The options for personalisation are vast, with hundreds of traditional colour and stain finishes available, that include the RAL colour chart as well those complementary to the Farrow & Ball and Fired Earth ranges. There's also the option to vary the colour on the inside of the door, so that it can match your internal décor.

Ironmongery options include stylish handles, escutcheons, knockers, letter plates, knobs and many more in a range of finishes, and why not consider decorative glazing in a range of stained, patterned, leaded, sandblasted and etched designs.

All of our doors use multi-layered, warp and twist resistant timber throughout their construction, with high specification glazing fitted as a standard. Factory applied paint finishes ensure a long life with very low maintenance.

QUOTE PREPARED FOR Mr Robin Hunt 54 Marshfield Road Chippenham Wiltshire SN15 1JS	SITE ADDRESS As quotation	PREPARED BY Andy Grain Designer Showroom: Cirencester	LEAD TIME Approximately 11-13 weeks from sign off of final detail.	TERMS • Deposit with Order 50%. • Stage payment approximately two weeks prior to installation 40%. • On day of completion to installers 10%.

No 54 at 100mm high and in Old Stables Font to top centre
pane.

WHAT MAKES OUR PRODUCTS SPECIAL?

All of our windows and doors are bespoke; this means they are made to the exact requirements of you the customer and of your home. They combine traditional or contemporary appearance with 21st century advances in security and insulation.

Frames are manufactured using quality, seasoned engineered timber – which provides resistance against twisting and jamming as the opposing grains even out natural moisture movement.

Comprehensive insurance backed guarantees of up to 30 years – covering your deposits and your installation for added piece of mind.

Four stage factory sprayed micro-porous coatings – ensure a pristine, low maintenance finish with a guarantee to the term of 12 years on paint finishes and up to 6 years on stained without the need for redecoration.

Factory fitted energy saving double glazed units – which are almost twice as effective at retaining heat as regular double glazing. Heat reflective coatings and argon filled units provide a class leading U-value of 1.1 W/m²K.

Internally beaded glass – means more secure windows and doors as the glazing cannot be removed from the outside. The bead of externally glazed products is always a point for water ingress, rot and can lead to premature unit failure.

Windows are fitted with perimeter locking systems – which pull the opening window tight against the seals for security, heat insulation and noise insulation. All window handles are key locking to meet current insurance requirements.

Doors are fitted with full height locking systems – and solid brass or stainless steel hinges for security and weather tightness. Cylinders are snap-safe, anti-bump, anti-pick and anti-drill to combat modern methods of burglary.

Vented and drained double glazed units – allow moisture to escape and air to flow around the seals to prevent premature misting and failure of the glass. 24mm and 18mm sealed units carry a 10 year guarantee, 14mm sealed units carry a 5 year guarantee.

Dual colour and colour matching available – we are able to offer a range of colours that complement those from well-known paint brands such as Farrow & Ball, Fired Earth and RAL colours.

A huge choice of traditional and contemporary hardware – to suit all types of property. Choose from a purpose designed suite from Samuel Heath and a range of traditional ironmongery designed by 'Timber Windows'.

Selection of astragal glazing bar sizes – to choose from. Bars are manufactured as a separate cassette which is preassembled and jointed with screws and staples. It is then bonded to the glass, pinned into the frame and sealed with a 'flexi-seal'. This avoids the problems associated with joinery products when bars are mitred and individually double-sided taped to the glass with no additional protection.

SERVING GLOUCESTERSHIRE & OXFORDSHIRE SINCE 1984

THE NEXT STAGE

Our surveys are completed by an experienced surveyor who will liaise directly with you to arrange a suitable time for the detailed survey to take place.

The survey will require measurements inside and out during daylight hours. We will run through the specification with you and explain how the products will be fitted and the choices available for internal finishing.

Once a final specification has been agreed you will receive an order confirmation which will show all aspects of the job. At this stage we ask for a 50% deposit on the job. Your deposits are protected in full by Timber Assured Insurance for peace of mind.

The order will be entered onto our system. We then have a triple check process which involves every item being individually checked by 3 people to ensure all details are correct.

Approximately 2-3 weeks prior to installation we will confirm a date the work will commence. At this point we ask for a 40% stage deposit.

Installations are carried out by our trained craftsmen who respect you and your home. Dust sheets are laid, and every measure is taken to protect your home and furnishings whilst the work is being carried out.

Your home will be left clean and tidy with all waste and debris removed. When the transformation is complete the final 10% will be due.

Post installation you will receive documents from FENSA (where applicable) acknowledging your installation, your Timber Assured Insurance policy, and we will provide a full maintenance guide with our guarantee. You will need your FENSA certificate if you come to sell your home so keep it safe.

Sit back and enjoy a warmer safer home.
