STAIRCASE ELEVATION

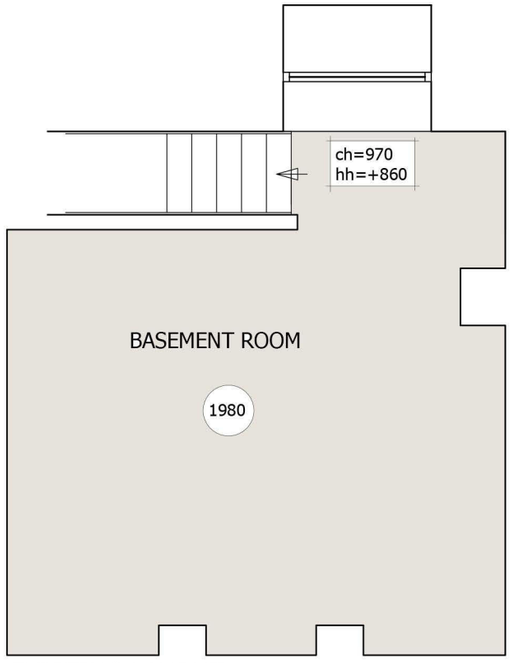

Remove plasterboard & studwork from the side of the existing staircase, and plaster space under stair flight with lime-based plaster.

Retain existing stairs, but introduce wooden balusters, (32mm x 32mm stop-chamfered square section) and 70 x 70 stop-chamfered newel post with square capping.

Strip existing paint and plaster and re-plaster with lime-based renovation plaster and water-based paint.
