

Riverbank grass seed mix

Our Riverbank grass seed mix contains species typically found on river embankments. These are very durable deep-rooted grasses, durable enough to withstand fast flowing water. They can also withstand being temporarily submerged in water.

-  20% *Phalaris arundinacea* - Reed Canary Grass
-  20% *Poa trivialis* - Rough Stalked Meadow Grass
-  30% *Festuca rubra* ssp *rubra* - Strong CRF
