

Wiltshire Council Planning Consultation Response

ECOLOGY

Officer name:	Jessica Cracknell
Date:	08/06/2026
Application Number:	PL/2026/02359
Proposal:	Conversion of Building (former blacksmiths) into dwelling (resubmission of PL/2025/05989)
Site Address:	Blacksmiths Cottage, Pye Corner, Box, SN13 8ED
Case Officer:	Lucie Turner

Recommendations:

☐	No Comment
☐	Support
☐	No objection
☒	Condition (no objection subject to conditions)
☐	Objection - further information required
☐	Objection in principle
☒	HRA.

Thank you for your consultation on the above application. I have reviewed the submitted documents against OS maps, aerial photographs of the site and surrounding area, together with GIS layers of statutory and non-statutory designated sites and existing records of protected species.

The following submitted documentation was reviewed to inform this response:

- Bat Scoping Survey and Nesting Bird Report. 02 April 2026. KD Consulting;
- Heritage and Planning Statement. April 2026. Nicholas Morley Architects Ltd;
- Proposed Site Plan. Nicholas Morley Architects Ltd. PL07;
- Proposed Elevations. Nicholas Morely Architects Ltd. PL06;
- Proposed Plans. Nicholas Morley Architects Ltd. PL05;
- Location Plan. Nicholas Morley Architects Ltd. PL04;
- Existing Site Plan. Nicholas Morley Architects Ltd. PL03;
- Existing Elevations. Nicholas Morley Architects Ltd. PL02;

Bath and Bradford on Avon Bat Special Area of Conservation (SAC): Habitat Regulations Assessment (HRA)

The application site is located within a consultation zone for Bechstein's bats, Greater Horseshoe bats and Lesser Horseshoe bats associated with the Bath and Bradford on Avon Bats Special Area of Conservation (SAC) and therefore has potential to result in significant adverse impact on the special features of that site. Appropriate Assessment (AA) under Section 63 of the Conservation of Habitats and Species Regulations 2017 (as amended) must be carried out by the relevant Competent Authority (the LPA) to determine the potential significant effects and the suitability of any measures proposed to avoid or mitigate those effects.

The Bat Scoping Survey and Nesting Bird Report identified the existing building as having negligible potential to support roosting bats. The site is assessed to offering suitability for foraging and commuting bats. The conversion of the existing building into dwelling will not require the removal of vegetation considered to be functionally valuable for foraging or commuting bats. Subject to retention of key boundary features and implementation of a sensitive lighting strategy, it is likely that the functionality of the habitats within the site and their availability to bats will not be adversely affected.

A test of likely significance has been carried out by the relevant Competent Authority (Wiltshire Council) as required by Regulation 63 Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019. This concluded that given the scale and nature of the development there is no mechanism for adverse effect. The Habitat Regulation Assessment (HRA) has concluded that the application will not result in any mechanism for adverse effect on Annex II bats, or on the conservation objectives of the SAC and subsequently is screened out of Appropriate Assessment.

The habitat within the proposed development site and the surrounding area is suitable for roosting, foraging and commuting bats. An increase in artificial lux levels can deter bats which could result in roost abandonment and/or the severance of key foraging areas. This will likely result in a significant negative impact upon the health of bat populations across the region. Artificial light at night can have a substantial adverse effect on biodiversity. Any new lighting should be for the purposes for safe access and security and be in accordance with the appropriate Environmental Zone standards set out by the Institute of Lighting Engineers in their publication GN01:2021, 'Guidance for the Reduction of Obtrusive Light' (ILP, 2021), and Guidance note GN08/23 "Bats and artificial lighting at night", issued by the Bat Conservation Trust and Institution of Lighting Professionals. Suitable lighting to ensure dark foraging and commuting routes can be retained could be secured via condition.

Priority Habitat Traditional Orchard and Deciduous Woodland

The site is designated as having woodland and traditional orchard priority habitat within the redline boundary. In accordance with Core Policy 50, development proposals must demonstrate how they protect features of nature conservation and geological value as part of the design rationale. There is an expectation that such features shall be retained, buffered, and managed favourably in order to maintain their ecological value, connectivity and functionality in the long-term. Where it has been demonstrated that such features cannot be retained, removal or damage shall only be acceptable in circumstances where the anticipated ecological impacts have been mitigated as far as possible and appropriate compensatory measures can be secured to ensure no net loss of the local biodiversity resource.

The proposal relates to the conversion of an existing building to a dwelling with a small, separate garden area comprising managed grassland and a single tree. The submitted Bat Scoping Survey and Nesting Bird Report confirms there is no woodland or traditional orchard present, and the garden is not considered priority habitat.

Biodiversity Net Gain

From 12 February 2024 Biodiversity Net Gain (BNG) became mandatory under Schedule 7A of the Town and Country Planning Act 1990 (as inserted by Schedule 14 of the Environment Act 2021). Based on the information available the biodiversity gain planning condition is not considered to apply to this application as the development meets the following criteria and is therefore below the de minimis threshold, meaning the development:

- does not impact an onsite priority habitat (a habitat specified in a list published under section 41 of the Natural Environment and Rural Communities Act 2006); and
- impacts less than 25 square metres of onsite habitat that has biodiversity value greater than zero and less than 5 metres in length of onsite linear habitat (as defined in the statutory metric).

Note to case officer: you should be satisfied that the proposals meet the above criteria and act accordingly. Further information will be required from the applicant prior to determination in the event the application is considered to be subject to mandatory biodiversity net gain.

Core Policy 50

Core Policy 50 of the Wiltshire Core Strategy requires all development to demonstrate no net loss of biodiversity and to seek opportunities to enhance biodiversity. The NPPF also encourages applications to deliver measurable net gains (para 186 d). It is anticipated that all developments will deliver no net loss of biodiversity. Whilst it is not expected that this development will result in significant loss of habitat, both CP50 and NPPF requires the inclusion of biodiversity enhancements, such as bird and bat boxes.

The Heritage and Planning Statement recommends the inclusion of a bat box. All details on exact locations and specifications must be added to all working plans (see condition below) and will become an enforceable part of the planning permission to avoid oversight and to ensure consistency and enforceability. Integrated features are generally maintenance-free and seek to benefit a target species/s or group/s and should

demonstrate viability in terms of position on the building, location and clustering in accordance with relevant guidance and the additional features. Bird/bat boxes will continue to be available for birds/bats for the lifetime of the development.

CONDITIONS:

1. Compliance with submitted documents

The development will be carried out in strict accordance with the following documents:

- Bat Scoping Survey and Nesting Bird Report. 02 April 2026. KD Consulting;
- Heritage and Planning Statement. April 2026. Nicholas Morley Architects Ltd.

REASON: For the avoidance of doubt and for the protection, mitigation and enhancement of biodiversity.

2. Ecological Enhancements

Prior to the commencement of any works, including vegetation removal and demolition, details of the number, design and locations of ecological enhancement features including bat boxes and bird boxes shall be submitted to the Local Authority for approval. The approved details shall be implemented for the lifetime of the development and before completion of the final works.

REASON: To provide mitigation /enhancement for biodiversity.

3. Lighting

No external light fixture or fitting will be installed within the application site unless details of existing and proposed new lighting have been submitted to and approved by the Local Planning Authority in writing. The submitted details will demonstrate how the proposed lighting will impact on bat habitat compared to the existing situation.

The plans will be in accordance with the appropriate Environmental Zone standards set out by the Institution of Lighting Professionals (ILP) Guidance Notes on the Avoidance of Obtrusive Light (GN 01/2021) and Guidance note GN08/23 "Bats and artificial lighting at night", issued by the Bat Conservation Trust and Institution of Lighting Professionals.

REASON: To avoid illumination of habitat used by bats.

INFORMATIVES:

Bat Species

There is a low risk that bats may occur at the development site. Many species of bat depend on buildings for roosting, with each having its own preferred type of roost. Most species roost in crevices such as under ridge tiles, behind roofing felt or in cavity walls and are therefore not often seen in the roof space. Bat roosts are protected all times by the Conservation of Habitats and Species 2017 (as amended) even when bats are temporarily absent because, being creatures of habit, they usually return to the same roost site every year. Planning permission for development does not provide a defence against prosecution under this legislation or substitute for the need to obtain a bat licence if an offence is likely. If bats or evidence of bats is found during the works, the applicant is advised to stop work and follow advice from an independent ecologist or the applicant is advised to follow the advice of a professional ecologist or to contact Natural England's Batline through the internet.

Final sign off – all matters addressed:
