Salvaged / reclaimed clay chimney pots set in a new mortar flauncing to match the brickwork mortar in colour and texture

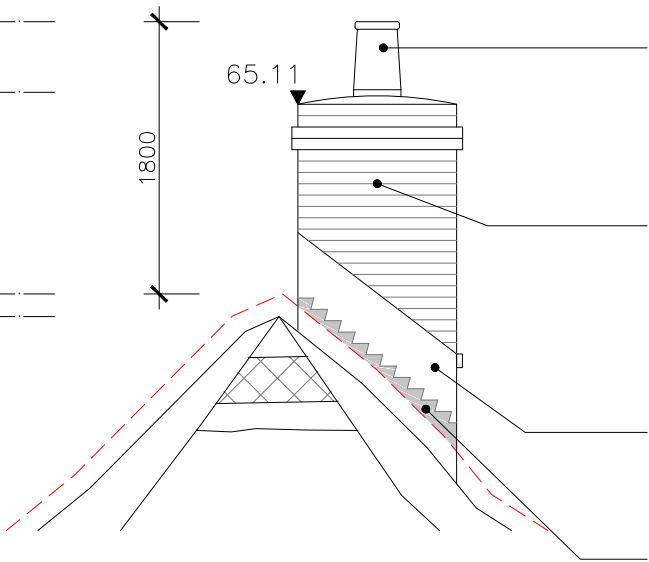

The existing brickwork above the low level dental band has deformed and requires rebuilding (shown hatched). Brickwork to be carefully removed, sorted, cleaned and set aside for reuse. Salvaged / reclaimed brickwork to match existing in size, colour, texture and finish to make up any shortfall. Existing brick corbel detail to be reformed to match existing at high level. New mortar flauncing to the head of the stack. New mortar to match existing in colour, texture and pointing profile.

Existing brickwork retained and re-pointed where required with mortar to match the existing in colour, texture and profile.

Install new Code 5 stepped lead flashing's and soakers to perimeter of chimney in line with Lead Sheet Association details
