

Case. PL/2026/0277.

Dear Mr Brown,

I am writing to you in reference to the application for land at Home Farm Bishopstrow.

The developer concerned have many hundreds of building applications all over the country and have no concerns about keeping green spaces safe for nature and humans and animals alike.

The land is useful arable land which can be used. We need it to be

²
much more self sufficient in growing our
own food in this country.

Next the requirement for new homes
in Warminster is only 90 in total.
We need to be developing brown sites
plus there are so many empty flats
above most of the shops in the town.
ideal for young people starting out.

Persimmon actually stopped building
on the very large estate to the
west of Warminster, because they were
not selling enough houses.

We do not have enough well
paid jobs here to sustain, those
wanting to buy their first home, as
wages are too low in the west.

There are no plans for new schools
doctors, surgeries to support the
extra homes requirements.

The proposed exit entry to the estate
is a dangerous place. This is

3
because the road is narrow there, two
berths leading to it.

We already have a real problem
with drivers speeding here.

Tailgating and not stopping at the
roundabout is an issue.

We need to save our green spaces.

Nature needs us to do that.

As a consequence people benefit
greatly from having access to these
green and peaceful places.

I do agree that all that extra
traffic will no doubt affect
the hotel nearby, people come there
for peace and being able to enjoy
walking somewhere lovely.

Please consider my objections
carefully. It would indeed be a
very great shame, if the application
was to be passed.

Yours Sincerely. Frances Osborne
