PHOTOGRAPHS SHEET

**SMALLBROOK HOUSE, EDWARD STREET, WESTBURY.
CHANGE OF ROOF FINISH TO REAR SINGLE STOREY LEAN-TO.
JOB NO: 2505
DOCUMENT: 2505 3 610 A**

Existing street (east) elevation to Edward Street. This elevation remains unaffected by the proposals.

Existing north elevation. This elevation remains unaffected by the proposals.

Existing south elevation. This elevation remains unaffected by the proposals.

Existing west elevation, facing the supermarket carpark. Existing roof finish to the main roof remains unaffected by the proposals. The lower lean-to roof is to be replaced with natural slate with an interlocking hidden backing system to improve water resistance.

View of the eaves of the existing lean-to roof, viewed from the south. Existing pantiles are to be replaced with natural slate (with a hidden waterproof backing system). All other details to be retained as existing.

Detail of existing pantiles to rear lean-to roof, showing gaps between tiles and degradation of tiles which, together with the low pitch of the roof, are allowing rain ingress into the rooms below.

View of office below rear lean-to roof, showing staining as a result of leaks/water ingress caused by gaps in pantiles above and pitch of roof being about half that recommended for traditional pantiles. The proposals address this issue.

GV 2025-09-01

Rev: A 2026-06-22

Amendments to annotation re change of proposed materials.
