Tree work required

Item	Species	Comments	Recommendations
T-1	Oak	Large, old oak. 160 cm stem diameter, 18 m tall. Bracket of Innonotus dryadeus between buttress on south side. Buttressing pronounced. Previously thinned causing significant epicormic growth along main limbs. Hollowing stem, decay in buttress on north side.	Reduce/shape whole tree by 5 m to leave 13 m overall height, and 8 m crown radius.
