Jane

Your comments are correct / accepted, with the exception of the lights. Client has spoken to the supplier and for H&S reasons the lights have to be red but only operate when the bollards go up and down (for obvious H&S reasons). The lights can be turned off when the bollards are not moving (i.e. when a vehicle isn't entering the property).

I trust this is acceptable / the H&S reason is understood.

We agree to an EOT to Monday 27 July.

Thanks for your efforts.

Regards

Will

Subject: PL/2025/09595 - 28 The Breach, Devizes

Dear Will,

Further to our telephone discussion, please can you confirm the following:

The brick walls and piers will be matching brick to the main dwellinghouse

The coping on the piers will be natural stone

Retractable bollards:

They will be constructed from stainless steel

The top face comprising the lighting will be LED lighting, a white/yellow colour and will be comprise static illumination

They will not make a noise when rising and retracting

They will operate electronically in line with the WC highways comments

Please note the existing bollards forward of the front boundary fence and hedge are stainless steel looking at my site photos. They are shown on the existing and proposed drawings as timber bollards. They have been included in the description of development as such.

In addition to the materials and trees, I will condition the lit surface of the lights in line with the above.

Please can you confirm the above by reply and agree to a further extension of time for the decision to be reviewed and issued of Monday 27 July 2026.

Regards,

Jane Sanger BSc (Hons) MA
