**New Access with Associated Turning Area  
Land at Ashton Road, Hilpert, Trowbridge BA14 7WQ**

**Introduction**

This Highway Technical Note has been commissioned by Mr Mark Wyatt in support of a planning application submission to Wiltshire Council as Local Planning Authority (LPA) for a new access to serve land at Ashton Road, Hilpert. The location of the site is shown below.

The site lies to the east of Ashton Road, a classified adopted public highway with the identification number C19. To the north the road forms a roundabout junction with the A361, Hilpert Drive whilst to the south east the road forms a priority junction with A350 Yarnbrook Road. To the north east is a small adopted residential cul de sac know as Pike Close which is also served by a priority junction.

Ashton Road at this point has a two lane single carriageway which benefits from street lighting but has no footways. The road at this point is subject to the National Speed Limit, but this transitions to 40mph just south of the roundabout junction.

A review of the accident history for the site has established that within the last 5 years there have been two recorded incidents on the Ashton Road roundabout that resulted in slight injuries. No accidents have been recorded on Ashton Road itself, which would suggest that this road is acting in a safe and efficient manner.

## Planning History

An application was submitted under reference PL/2024/09664 for an access for this site, which was to be taken directly from the A361 roundabout to the north.

In considering the highway implications of this proposal, the Highway Officer said:

*The proposal is for direct access from the existing A361 roundabout, which is considered unacceptable in highway terms for a private access. The A361 roundabout is a four arm roundabout subject to a 40mph speed limit, which serves as an important distributor road and the main route in to the town from the North/ North-East. A private access directly from this roundabout would not be accepted by this Highway Authority and would be likely to create significant highway safety issues due to the unusual and unexpected manoeuvres required to exit the site on the roundabout, including by large and heavy vehicles.*

*I recommend that the application is refused on highway grounds for the following reason:*

*The geometry and design of the access as proposed is likely to result in excessive manoeuvring on roundabout, with consequent risk of additional hazard to all users of the road.*

The application was indeed refused for the following reason:

*The development would have an unacceptable impact on highway safety and would fail to encourage safe and efficient movement of people and vehicles. The geometry and design of the access as proposed would be likely to result in excessive manoeuvring on the roundabout, and would have a consequential risk of hazard to road users and pedestrians on said roundabout and the connecting roads resulting in an unacceptable impact on highway safety that cannot be mitigated. The development therefore conflicts with Core Policies 57, 60 and 61 of the WCS as well as paragraphs 115 and 117 of the NPPF. In accordance with paragraph 116 of the NPPF the proposed development is refused.*

The refused application was the subject of a planning appeal and when considering the highway implications, the Inspector said:

*The appellant has explained that he is a highways contractor and that he purchased the appeal site with the intention of relocating plant equipment from a rented yard in Steeple Ashton. The land previously being used for livestock grazing and agricultural storage. However, as the application does not seek a change of use from agriculture to the storage of commercial plant and equipment, I have considered the appeal on the same basis as the Council, that the proposal comprises a new dropped kerb and access drive from the roundabout to a field used for agriculture.*

*Overall, I conclude that the proposed development would have an unacceptable and detrimental impact on highway safety. Consequently, the proposal conflicts with Policies CP57, CP60 and CP61 of the Wiltshire Core Strategy which encourage the safe movement of people and goods and requires development to have a safe access to the highway network. In addition, it would be contrary to paragraph 116 of the National Planning Policy Framework, which states that if there would be an unacceptable impact on highway safety, development should be refused.*

*For the reasons set out above, the proposal conflicts with the development plan and there are no material considerations that would outweigh that conflict. Therefore, the appeal should be dismissed.*

## Proposed Development

This application seeks to change the use of the land to allow the Applicant to store his contractors equipment within the site, and to create a new access, in the form of a simple verge crossing, onto Ashton Lane, 20.0m south of Pike Close.

## Access and Visibility

Whilst it is noted that this section of Ashton Road is subject to the National Speed Limit, on-site observations noted that traffic speeds within this area were much lower than the posted speed limit, due to cars exiting from the roundabout and travelling south, or cars approaching the roundabout from the south and slowing down to stop at the junction.

In order to establish the actual traffic speed and volumes using this section of Ashton Road, CTS Traffic and Transportation were commissioned to undertake a 7-day automatic traffic count. ATC equipment was installed in Ashton Road within the vicinity of the proposed access on 9<sup>th</sup> December 2025. The table below provides a summary of the recorded 85<sup>th</sup> percentile traffic speeds and volumes, whilst the survey data is included as [Appendix 1](#) to this Note.

| Ashton Road (60mph)                          |            |                 |            |          |
|----------------------------------------------|------------|-----------------|------------|----------|
| Traffic Speeds (85 <sup>th</sup> percentile) |            | Traffic Volumes |            |          |
| Southbound                                   | Northbound | Southbound      | Northbound | Combined |
| 33.4 mph                                     | 35.0 mph   | 1283            | 1304       | 2587     |

From the table above, it can be seen that for both northbound and southbound traffic flows, the recorded 85<sup>th</sup> percentile speeds were far less than the posted 60mph speed limit.

Using the sight stopping criteria set out within Manual for Streets where at least 5% of all recorded vehicles were HGV's or PSV's a reaction time of 1.5 seconds is employed, together with a deceleration rate of 0.375g, a visibility Y distance of 59m would be required to the north, whilst a Y distance of 54 m would be required to the south. In this case, a 2.4m X distance would also be required.

Drawing numbered NJC-001 is therefore included as [Appendix 2](#) to this Note which show the position of the new access together with the splays based on the ATC results. The splays can be fully contained within land falling within the public highway, or within land under the control of the Applicant. This has been confirmed by an extent of highway search supplied by Wiltshire Council, and which is included as [Appendix 3](#) to this Note. Any consent granted can include a suitably worded condition that requires the splays to be kept clear of all obstructions above 600mm of carriageway level.

## Access and Tracking

The site is used as contractors storage by the Applicant on a low key basis, and the largest sized vehicle that he operates is a 3.5t Transit tipper. Drawing numbered NJC-002 is therefore included as [Appendix 4](#) which shows the ability of such a vehicle entering the site, turning and exiting in forward gear. Gates are to be fitted to the access positioned 10.0m back from the edge of the highway that ensures that the largest vehicle generated can stand clear of the highway whilst the gates are being opened or closed.

## **Summary and Conclusion**

This Highway Technical Note supports a planning application for a new access to serve a contractors compound at Ashton Road, Hilperton , Trowbridge.

Visibility splays are to be provided based on automatic traffic count results recorded within the vicinity of the proposed access.

The access is to be used infrequently and has been designed to accommodate the largest vehicle likely to be generated on an infrequent basis.

The formation of the verge crossing will give the Applicant an opportunity to access the site, which currently relies on driving over a verge to the north at the A361 roundabout, which is not considered to be acceptable to the Local Highway Authority.

Nick Culhane January 2026

## **Appendix 2**

### **Proposed Access and Visibility**

Client

Project

NEW ACCESS AT ASHTON ROAD

Drawing Title

ACCESS AND VISIBILITY

Drawing Status

FOR INFORMATION

Date  
JAN 2025

Scale  
1:250

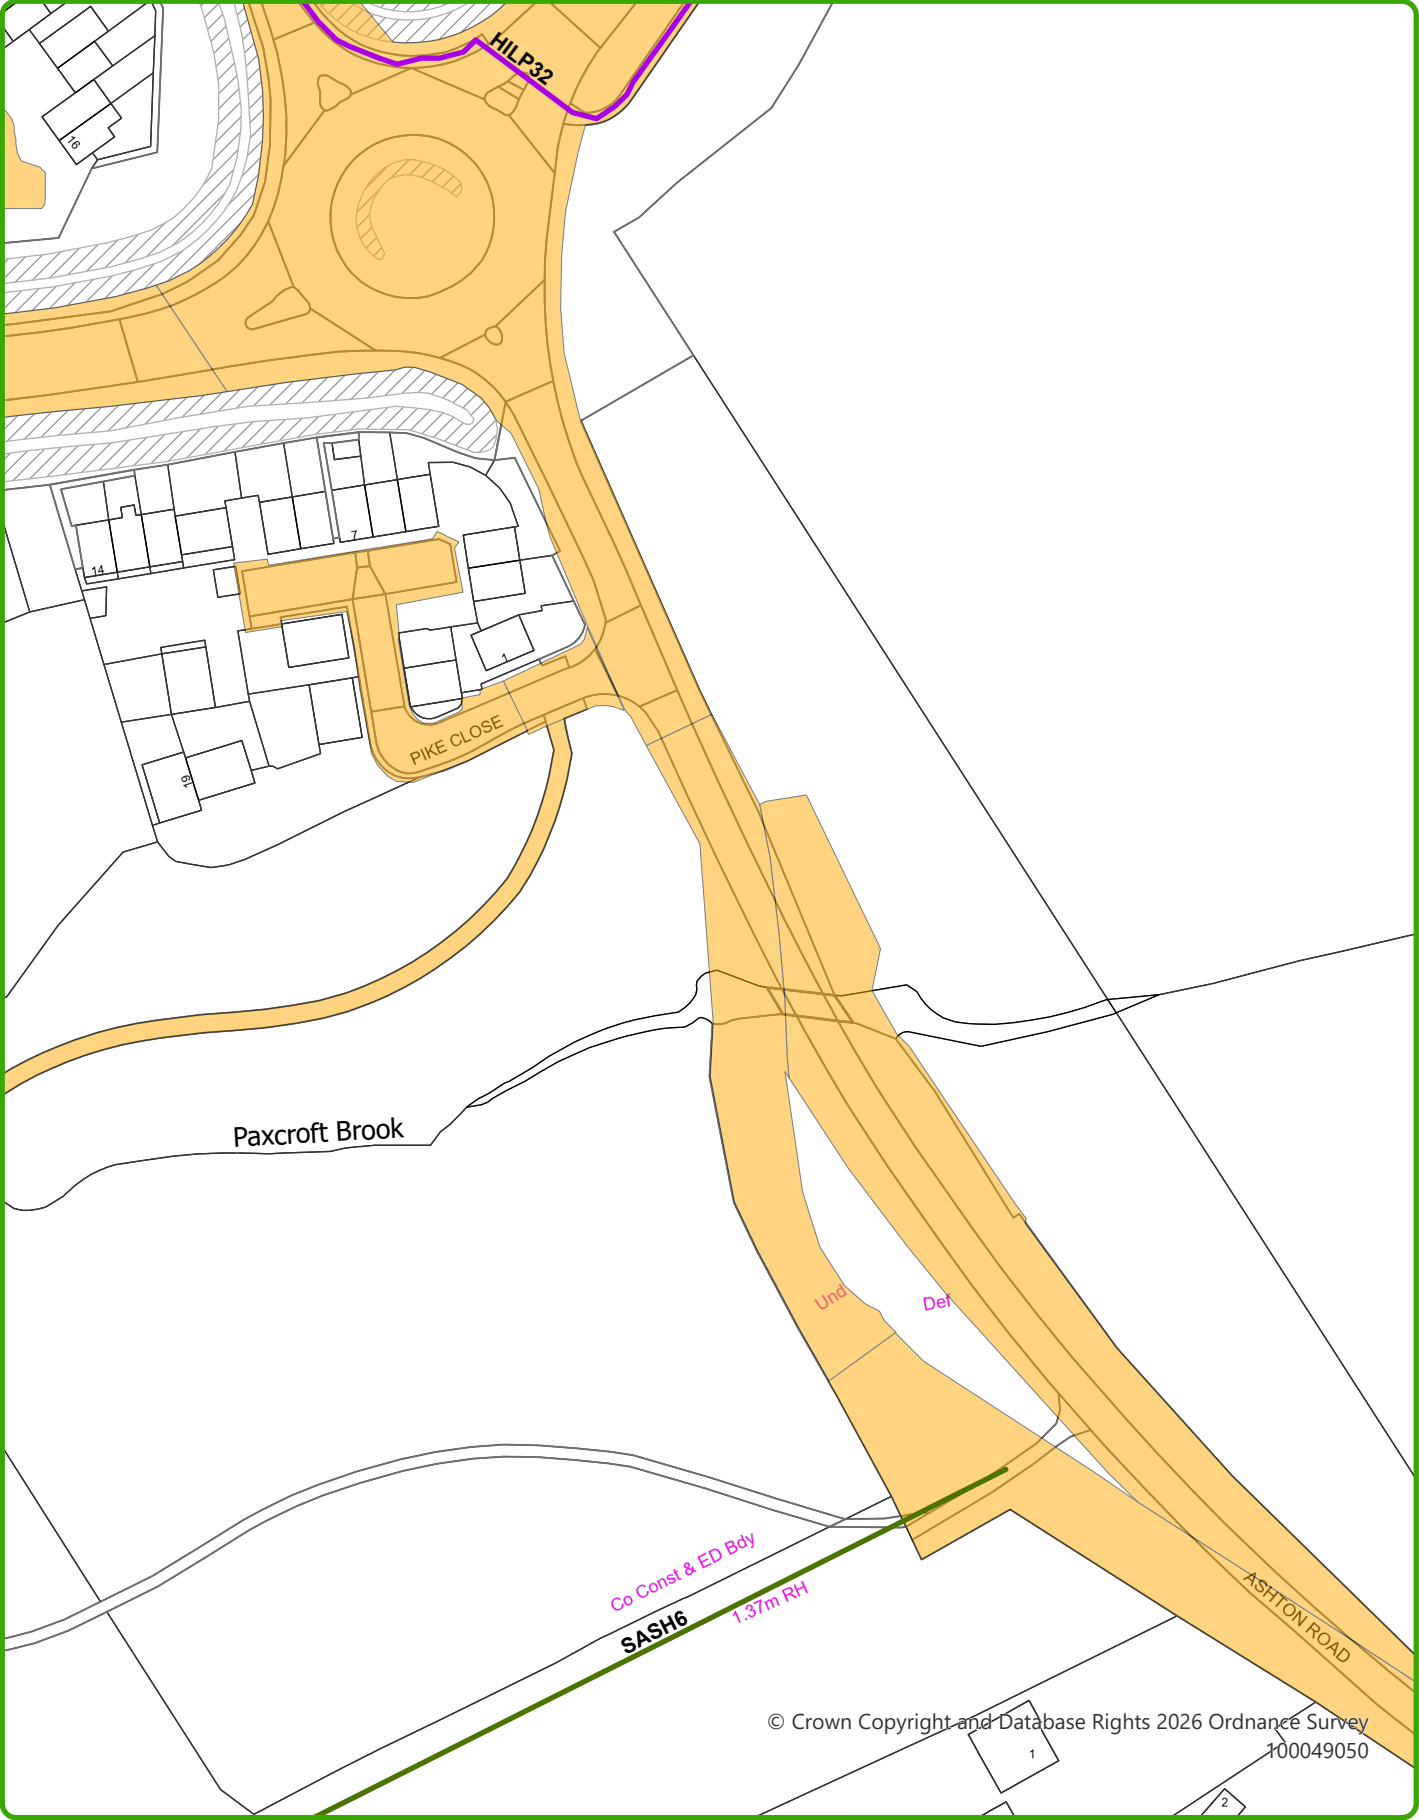

Size  
A1

Drawing No.  
NJC-001

Rev  
-

## **Appendix 3**

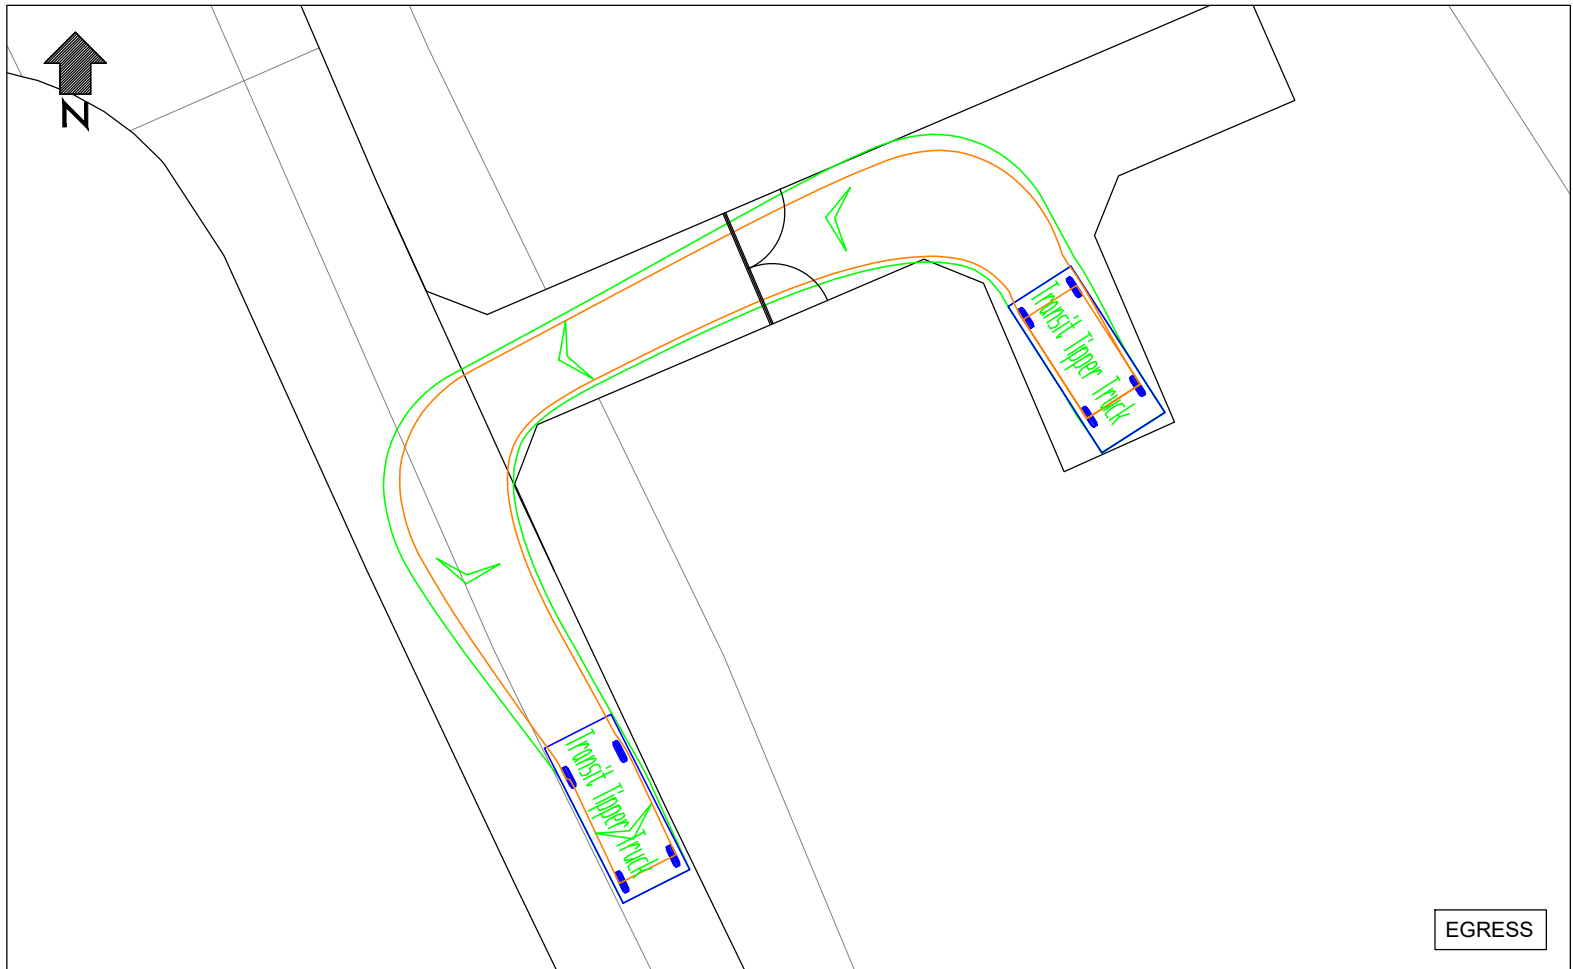

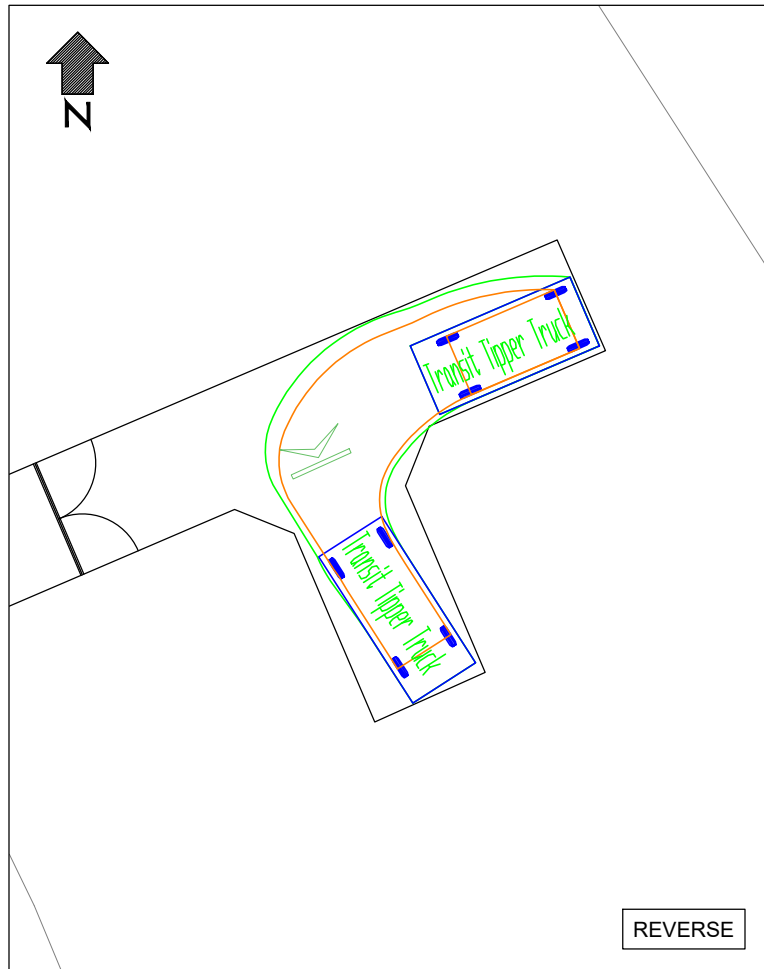

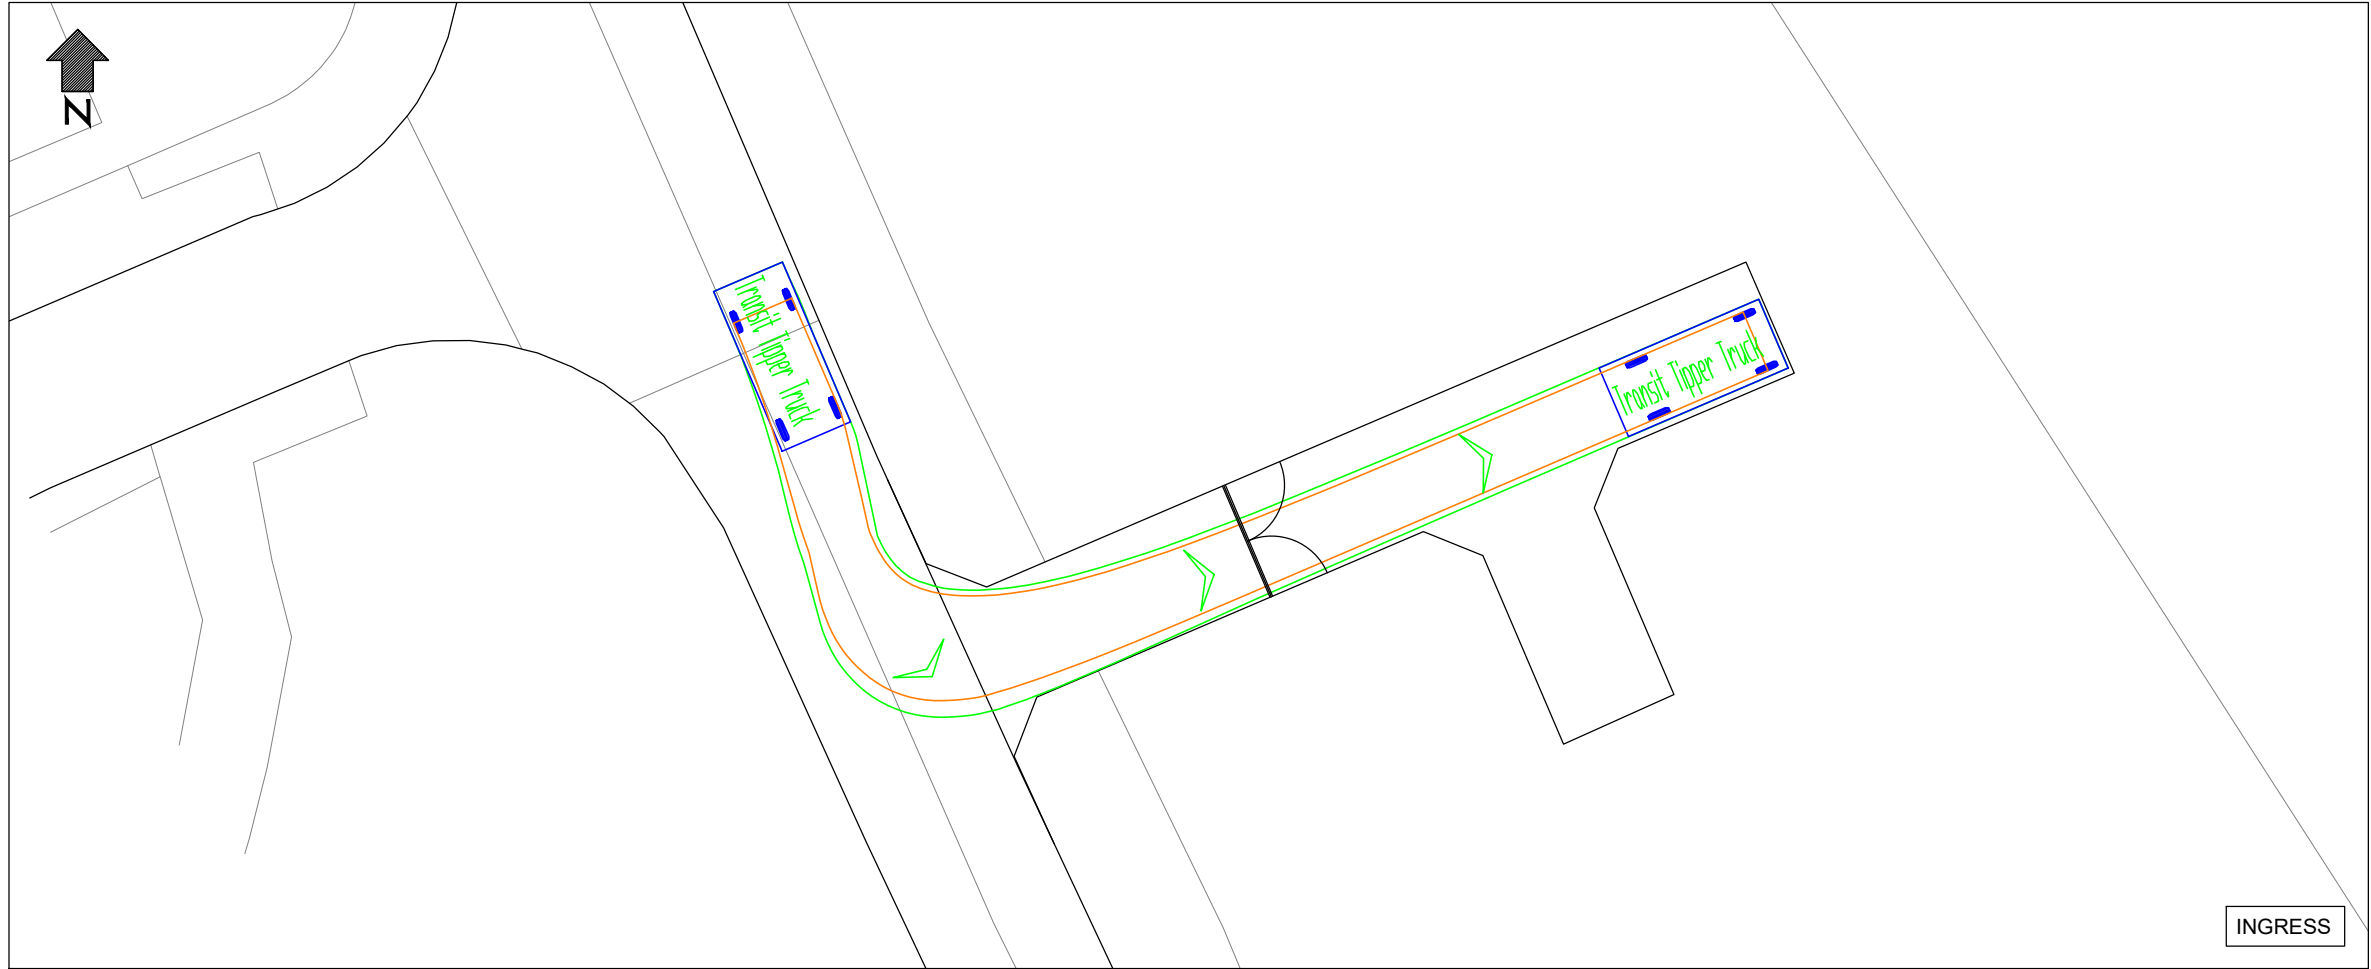

### Extent of Highway Search

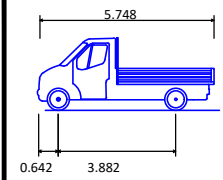

Please Note  
The highway extent shown on this plan has been prepared for the property named above.  
The extent shown cannot be relied upon for any highways that do not abut or serve the property.

## **Appendix 4**

### **Swept Path Tracking**

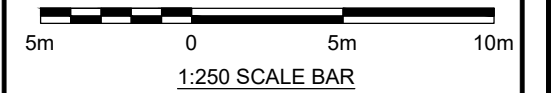

#### VEHICLE DETAILS:

Green line shows body

Orange line shows axle/wheels

|                             |        |
|-----------------------------|--------|
| Transit Tipper Truck        |        |
| Overall Length              | 5.748m |
| Overall Width               | 2.470m |
| Overall Body Height         | 1.583m |
| Min Body Ground Clearance   | 0.357m |
| Track Width                 | 2.100m |
| Lock-to-lock time           | 4.00s  |
| Curb to Curb Turning Radius | 5.900m |
