

423300mE

NOTES: DO NOT REMOVE THESE NOTES FROM THIS DRAWING

The horizontal & vertical control of this survey is based on Ordnance Survey grid as translated from GPS co-ordinates using the OSTN15 & OSGM15 transformation as supplied by OS. We have applied a reverse scale factor to maintain true ground distances. Vertical values may differ from existing OS benchmarks in the vicinity which should be disregarded. All levels should be taken from LDS survey stations.

While every effort is made to identify all visible above-ground features, it should be noted that there may be features obscured or inaccessible at the time of survey.

All levels, heights, measurements and dimensions are in metres unless otherwise stated.

Eaves levels are taken at the bottom of the lowest roof tile. Where underside of fascia or other features are surveyed these are recorded as such.

All below-ground features (including drainage, voids and services) have been identified from above ground and therefore all details relating to these (such as sizes, depth, pipe positions and alignments etc.) will be approximate only. Underground services have not been traced, but any visible surface features have been located.

Trees have been drawn diagrammatically (i.e. circular) showing average canopy spread, however their true shape in plan will be different. Every effort has been taken to identify species, but where critical these should be verified by a specialist.

Client: **SARA ALLOM**

Drawing Title:
TOPOGRAPHIC SURVEY

Project:
**HOPE COTAGE, LIVERY ROAD
WINTERSLOW
SP5 1RF**

Survey is to OS Grid, located via use of GPS positioning.

Level values in metres, related to Ordnance Datum Newlyn.
