

Vivara Pro Build-in WoodStone Bat Box

The Vivara Pro Build-in WoodStone Bat Box has been specifically designed to fit into the cavity of house walls. It features a slim sized entrance hole which can sit flush in a course of bricks to provide a discreet entry way for bats.

It is manufactured from hard-wearing woodstone and plywood with removable side panels so that several boxes can be placed side by side. Position the box at least 2m above ground level away from artificial light sources. Woodstone is a mixture of sawdust from FSC wood sources and concrete, and it is designed to last for years. It is breathable so there will be no problems with condensation and maintains a consistent temperature inside, providing excellent insulation for roosting bats.

Note: If you require this product to fit with UK Brick specifications choose [PRO UK Build-in WoodStone Bat Box](#)

- **Dimensions:** 21 x 15 x 50 cm (L x W x H)
- **Weight:** 5.6 kg
- **Material:** WoodStone

Schwegler 1FF Bat Box

The Schwegler 1FF bat box is spacious enough for bats to use as a summer roost or nursery site, and the inner dimensions of the 1FF have a reducing width making it ideal for bat species which inhabit crevices such as pipistrelle and noctule bats. For conservation projects and studies, the entire front of the box can be easily swung open for inspection purposes. The bat box is also open at the bottom allowing droppings to fall out, so it does not need cleaning. The 1FF bat box can be sited in trees or on buildings and is best positioned at a height of between 4m and 6m. Please note that once bats have inhabited a roost or nursery site, they may only be disturbed by licensed bat workers.

- **Dimensions:** 27 x 14 x 43 cm (L x W x H)
- **Entrance hole dimensions:** 24 x 12 cm (L x W)
- **Weight:** 9.5 kg
- **Material:** Schwegler Woodcrete
- **Colour:** Black with stable hard-wearing wooden insert
- **Supplied with:** Galvanised steel hanger and aluminium tree-friendly nail

Manthorpe Swift Nesting Brick

- Takes the place of a single brick the coloured face blends into the surrounding masonry
- Neat and simple to install, can be fitted quickly during the bricklaying.
- Integral nest concave provides ideal starting point for nest building
- 29 x 65 mm opening leading into a recessed entry tunnel
- 413cm² of floor area gives the maximum habitable living space within the wall construction

The Manthorpe Swift Brick has been developed in conjunction with major house builders and conservation experts to provide a safe, spacious and habitable area to allow swifts to nest within the well-built construction of modern houses.

- Colour: Antique Red, Terracotta, Buff, Grey, White, Black
- Size 227 x 80mm
- Facing Brick Size 9" x 3"
- Opening Size 29 x 65mm
- Floor Area 413cm²
- Packaging 2 per box
- Material Base material: uPVC
- Top material: Polypropylene

Schwegler 2M Nest Box

Like the [1B nest box](#), this box also has a brood chamber with an internal diameter of 12cm. It differs, however, in that it can be freely suspended and has a conical roof. These features protect against cats and deter martens. It is very popular in private gardens and especially around fruit trees, mainly in areas where the trees are short and have many branches. Colours may vary compared to images.

The front panels of the 1B and 2M nest boxes are interchangeable. The 2M nest box has three different sized entrance holes which can be matched to the predominant species of birds in the locality.

Entrance hole 32mm:

Great-, blue-, marsh-, coal- and crested tit, redstart, nuthatch, collared and pied flycatcher, wryneck, tree and house sparrows, and occasionally bats.

Entrance hole 26mm:

Blue-, marsh-, coal- and crested tit and possibly wren. All other species are prevented from using the nest box due to this smaller entrance hole.

Entrance hole oval (29 x 55mm):

Redstart; also used by species that nest in the diameter 32 mm boxes. However, because more light enters the brood chamber, it is preferred by redstarts.

Comes with galvanized steel hanger.
